Housing Construction Statistics

General Introduction

This volume was designed as an historical supplement to the current data issued by the Bureau of the Census in three publication series of its Construction Reports program—Housing Starts, Series C20; Building Permits, Housing Authorized in Individual Permit-Issuing Places, Series C40; and Building Permits, Housing Authorized in Permit-Issuing Places, Summary Statistics, Series C42. It presents for the first time in compact form, 26 statistical time series which cover various periods from 1889 to 1964. These statistics show the number of units and the dollar value of new housing at different stages of construction and for different universes. Section A presents data on housing starts for the combined permit and nonpermit sectors of the United States. Section B presents only data covering permits authorized in permit-issuing places which, by 1964, accounted for 84 percent of private housing starts.

This summary volume serves two immediate needs—first, to bring together for the convenience of users of housing statistics the several significant historical series available, and, second, to provide through brief descriptive text and pre-

cise source notes, a guide to an evaluation of the historical data presented. These objectives are similar to those of the monthly and annual Housing Starts, Series C20, and the monthly and annual Residential Building Permits, Series C40 and C42, except that in the monthly and annual volumes the emphasis is on current data with limited historical data as background.

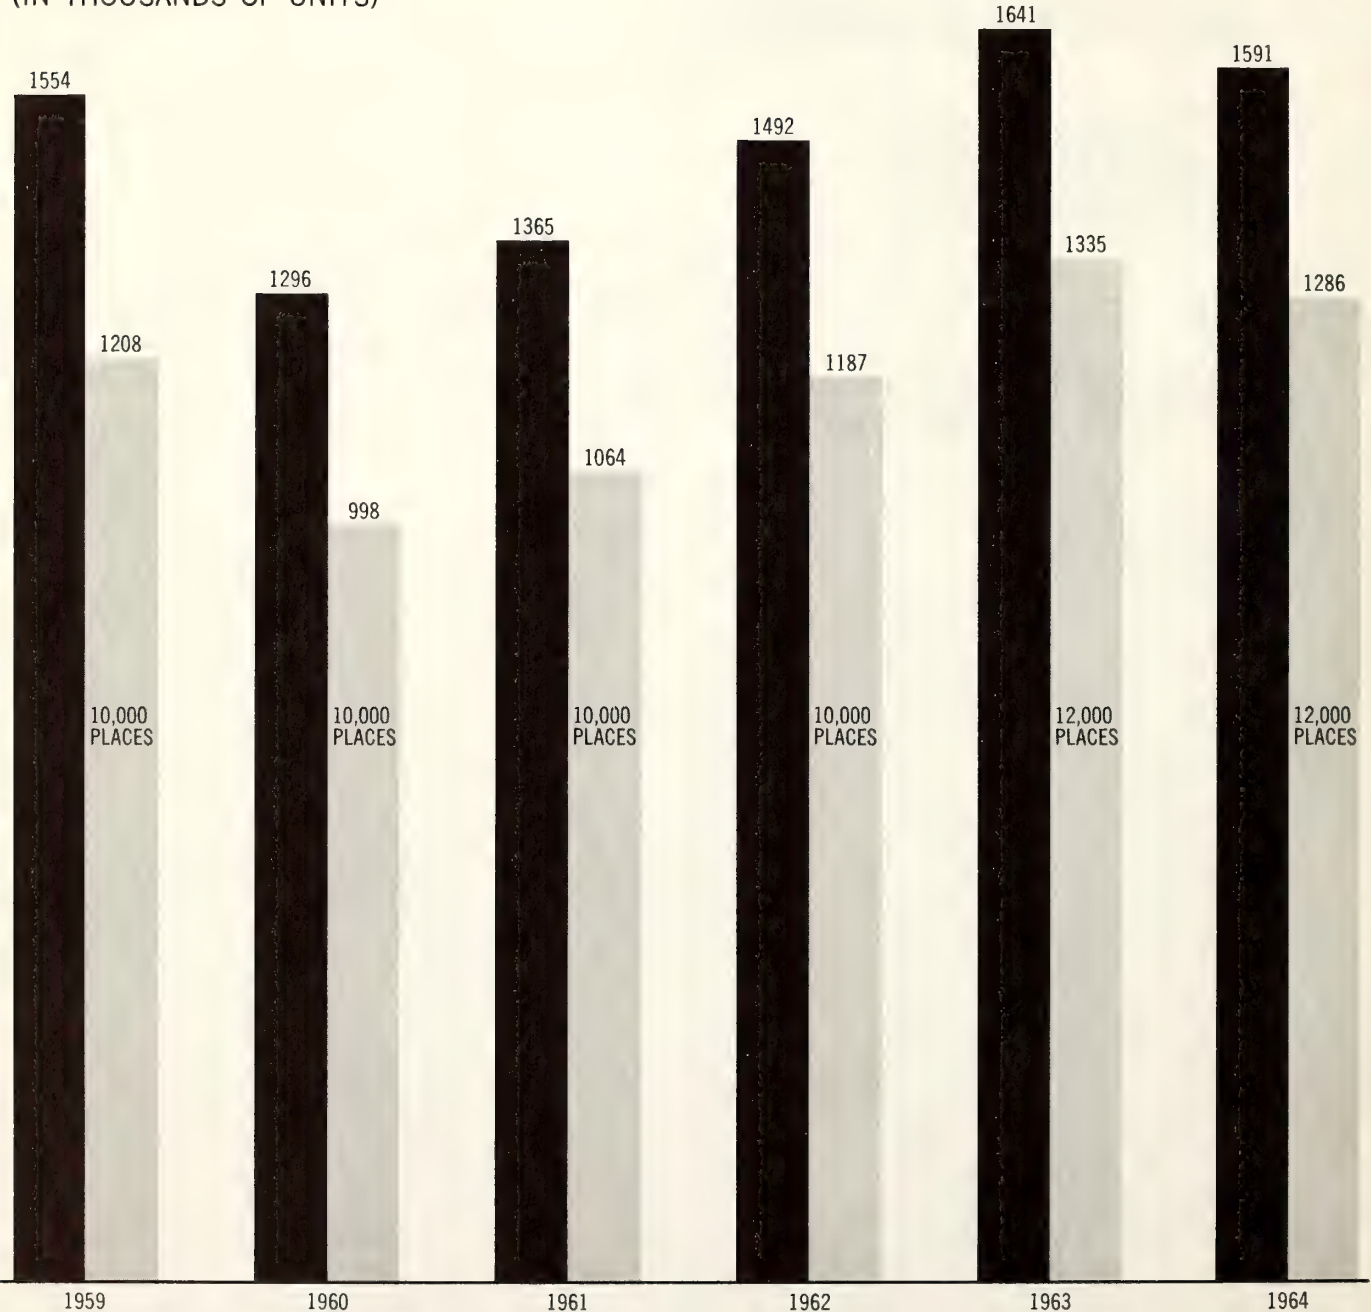

The historical statistics selected for presentation here consist primarily of published data available in some 200 separate reports prepared by the Bureau of the Census, the Bureau of Labor Statistics, the National Bureau of Economic Research, Incorporated, and the Twentieth Century Fund. In the compilation of these data, the Bureau of the Census has not attempted to establish new series, revise existing series, or interpret the comparability through time of the statistics presented. Unpublished figures from the files of the Bureau were used in a few instances. Source notes covering published and unpublished data are presented for each table.

The scope of the present volume does not include the so-called “lapsed” series which were

Housing Units Started and Housing Units Authorized: 1959 to 1964

(IN THOUSANDS OF UNITS)

once compiled monthly or annually, but abandoned at some time in the past.

Changes in concept and coverage in reporting affect vitally the understanding of the statistics presented from 1889 to 1964. Unfortunately, definitions, particularly those relating to data for the earliest years in the series covered, may never have been published. In all such instances, effort has been given towards clarifying the figures shown, by giving for each table specific information about the data presented.

All series begin with 1964 and run backward in time. This arrangement was selected because it lent itself to more compact and more uniform presentation than the alternative of beginning with the earliest year, which varies from series to series. No data are shown for years subsequent to 1964. Twelve of the 26 statistical time series present only annual data; the remaining series present monthly data, from either January 1959 or January 1960 through December 1964.

The data in this report are presented in two sections, one dealing with housing starts and the other with building permits. The statistical tables in each section are preceded by detailed source notes and information affecting the data, such as coverage and methodology. Section A presents 13 statistical time series which relate to housing starts. Since 1959, more than four-fifths of all housing starts were located in the permit sector. Section B presents an additional 13 statistical time series covering the permit-issuing places.

Basically, the procedures common to all annual estimates from 1889 through 1953 for privately-owned housing authorizations and starts involve three steps. First, on the basis of population relationships, an expansion of the reported permit data to cover nonreporting places; second, development on the basis of either population relationships or building rates, of data for nonpermit areas; and third, the application of adjustments for lags, lapses of permits, and under-reporting. For the years 1889 to 1953, the permit figures are limited to estimates covering permits issued in urban places. In 1954, the Bureau of Labor Statistics expanded the area covered in the publication of permit data from about 3,400 urban places to all permit-issuing places. Approximately 6,600 places were identi-

fied in 1954 as the permit-issuing universe. From January 1954 to July 1959, for purposes of estimating the permit segment of housing starts, the Bureau of Labor Statistics held to this 6,600-place series, although approximately 700 additional permit-issuing places were identified.

When the Bureau of the Census assumed responsibility for the construction statistics program in July 1959, the dimensions of the building-permit universe were re-examined, and a survey was undertaken in 1959 to identify all permit-issuing places in the United States. Approximately 3,000 additional places were identified, bringing the total number of permit-issuing places to about 10,000 places. Thus, in 1959 the Bureau of the Census established the 10,000-place series. At the same time the nonpermit sector was reduced. Again, in 1962, based on another comprehensive survey, about 2,000 additional permit places were identified and this established the 12,000-place series, further reducing the nonpermit sector of the starts universe.

The standard census geographic regions are used in the tables of this report. States contained in each region are as follows:

NORTHEAST—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania.

NORTH CENTRAL—Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas.

SOUTH—Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas.

WEST—Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Alaska, and Hawaii.

The distribution of housing starts between units inside and units outside Standard Metropolitan Statistical Areas is based on the definitions published by the Bureau of the Budget in *Standard Metropolitan Statistical Areas*. Data for the period beginning with January 1964 are based on 1964 definitions; data for 1961-1963 are

General Introduction

based on 1961 definitions; data for 1959-1960 are based on 1959 definitions; and data for 1954-1958 are based on 1950 definitions. Overlapping data are shown where definitions changed.

Since 1960, the compilation of the housing starts monthly series has depended on 5 steps. First, an estimate is prepared of the number of housing units for which building permits have been issued in all permit-issuing places each month. Second, a sample field survey is made of the use of permits. In this survey, a sample of building permits is selected each month and then an inquiry is made of the owner or the builder to find out whether and when the units covered by the permit have been started. In case the units authorized by permits in a particular month are not started by the end of that month, follow-up calls are made in successive months to find out when the units were actually started. From this sample of permits, ratios are calculated of the number of units started to the number of units covered by permits, with separate ratios for units started each month from permits of that month and of each preceding month. These ratios are then applied to the total number of units authorized by permits in the same months to provide estimates of the total number of units started each month with permit authorization. Third, having produced an estimate of the number of units started in each month with permit authorization, an adjustment of about 5 percent is next made to take care of units started within permit-issuing areas but without permit authorization.

Fourth, to produce an estimate of units started in areas where building permit systems do not exist. This estimate is based upon current monthly surveys in a selected sample of broad areas (counties or groups of counties). In these areas, visits are made to a select group of informed people and a list is obtained from them of all residential buildings they know to have been started within the nonpermit portions of these areas during the preceding month. Information provided by these sources is next checked by field visit. This is followed by the selection of a sample of small land areas; these small areas are canvassed intensively by the enumerators to find by observation, all units started since the enumerators' last visit a month earlier. On the

basis of these findings, estimates are made of the number of units not reported by the informed sources, and these are added to the information from the sources to provide an estimate of total construction in the nonpermit areas.

The final or fifth step is to add the starts in permit places and the starts in nonpermit areas to obtain the total privately-owned units started each month.

Information on public housing is obtained, for the most part, from the agencies involved, e.g., Public Housing Administration, Department of Defense, New York City Housing Authority, and other State and local authorities.

Statistics for units authorized by building permits relate to the issuance of permits rather than to the actual start of construction. They do, however, provide some indication of activity in residential building in advance of the start of actual construction. Although construction is started on most residential buildings in the same month in which the permit is issued, several months or more may pass from the time a permit is issued to the start of construction. In a small number of cases, (probably less than 2 percent) permits issued are not used at all and are permitted to lapse. The 12,000 areas or 10,000 areas with local building-permit systems for which figures are given in this report account for a major portion of residential building in the United States. For the country as a whole, about 84 percent of the private housing units were constructed in areas of this permit-issuing universe during the 1959 to 1964 period.

Housing units authorized in permit-issuing places are treated as nonfarm even though a negligible number are located on farm properties.

Basically, the procedure followed in arriving at the monthly building-permit authorization totals involves the cumulating of monthly data from all permit-issuing places that authorized 50 or more housing units (20 or more in some States) in a recent year along with estimates for the less active places based on a stratified probability sample of these places.

A more detailed discussion of the uses and limitations of building-permit data is provided in the Census Bureau's monthly reports on Building Permits (C40 and C42).

Since the estimates of housing starts and private housing units authorized by local building permits are, to a considerable extent, based on samples, they are subject to sampling variability and may be expected to differ from what would be obtained from a complete count in which identical measurement techniques were employed. The standard error is primarily a measure of such sampling variability. The chances are about 68 out of 100 that the difference due to sampling variability between an estimate and the figure that could be obtained from a complete enumeration is less than the standard error; about 95 out of 100 that the difference is less than twice the standard error; and 99 out of 100 that it is less than $2\frac{1}{2}$ times the standard error. The relative standard error is the sampling error expressed as a percentage of the total number of housing starts or authorizations. For the monthly estimate of total housing starts as computed for this report, it is between 3 and 4 percent. For housing units authorized, it is approximately 1 percent.

The seasonal factors for private housing starts and building permits were developed using the X-11 version of the Census Method II program. The background and rationale of Method II is described in *Electronic Computers and Business Indicators* by Julius Shiskin, National Bureau of Economic Research Occasional Paper 57, 1957. A description of the X-11 version appeared in the October 1965 issue of *Business Cycle Developments*, published by the Bureau of the Census. Further information on X-11 may be

obtained from the Chief Economic Statistician, Bureau of the Census, Washington, D. C. 20233.

Seasonal adjustments for private housing starts are based on data for shifting periods; for the most recent years, the period is May 1959 to March 1965. Seasonal factors were developed separately for starts in permit areas and in non-permit areas for each geographic region with the exception of starts in nonpermit areas in the West, where irregularities in the data due to the small magnitudes of the figures made estimation of seasonals impracticable. Because of the irregularity of all the starts series, it has not been possible to estimate working-day factors internally from the data. Hence, housing starts data are not adjusted for working-day influences at the present time.

Seasonal adjustments for building permits are based on data for shifting periods; for 1964, the period is January 1959 to March 1965. Seasonal factors were developed separately for permits issued by geographic region and by type of structure; and, they take account of the effect of working days which are defined as Monday through Friday, excluding eight major holidays (New Year's, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Veterans' Day, Thanksgiving, and Christmas). Each reported monthly permits total is divided by the number of working days in the month to arrive at a daily average for that month. The seasonal adjustment factors are then applied to the daily average and the result multiplied by the number of working days in the year.

SECTION

A

Housing Starts

Introduction

Section A presents 13 series of statistical data related to new housing units started in permit-issuing places and non-permit areas. Each series begins with data for 1964 and goes back in time as far as meaningful figures are available. Three of the five annual series present data at the national level for 76 years, while the other two cover the period 1935 to 1964. The monthly data tables cover only the 6 years from 1959 to 1964.

In this document, a housing start consists of the start of construction on a new housing unit, when located within a new building which is intended primarily as a housekeeping residential building designed for nontransient occupancy. Start of construction for private housing units is defined as the beginning of excavation for the foundation of a building; for public housing units it is defined as when the construction contract is awarded. All housing units in a multi-family building are counted as being started when excavation for the building is started. A housing unit is a single room or group of rooms intended for occupancy as separate living quarters by a family, by a group of unrelated persons living together, or by a person living

alone. A housekeeping residential building is one consisting primarily of housing units. Housing starts exclude group quarters (such as dormitories and rooming houses) and transient accommodations (such as transient hotels, motels, and tourist courts) and mobile homes (trailers). (The preceding definition of housing start applies strictly only to the data for 1959 to 1964; for earlier years, the definition is less precise.)

Since July 1959, the Bureau of the Census has been responsible for the completion and publication of data on housing starts. These data are released in monthly reports in series C20 showing starts both including and excluding farm housing. Prior to 1959, starts are available only for "nonfarm housing," which is comparable to the "excluding farm housing" category, in current reports.

From 1920 to July 1959, the Bureau of Labor Statistics was responsible for compiling and estimating statistics on the volume and value of new nonfarm dwelling unit construction in the United States. The development of the series

on nonfarm housing starts paralleled the expansion of the primary source of information—the collection of local building-permit data.

To meet the needs of a congressional committee investigating the acute housing shortage that developed during and after World War I, the Bureau of Labor Statistics began in 1920 to collect data from local officials who issued building permits.

Prior to that time, from 1914 to 1919, building-permit information had been collected for approximately 200 principal cities by the U. S. Geological Survey, whose primary interest was in the kinds of materials (wood, brick, stone, or concrete) used in new residential and nonresidential buildings. These annual reports did not show the number of new dwelling units provided but gave the number and cost of buildings constructed.

Learning that the Geological Survey was about to drop its program, the Bureau of Labor Statistics arranged in 1920 to continue the building-permit reporting system. Plans were made to acquire and publish data on the number of units and value of new nonfarm residential housing as well as the intended use and value of nonresidential buildings.

In 1920, the Bureau of Labor Statistics received building permit reports from 189 of the 287 cities in the United States that had population of 25,000 or more. The following year, coverage was increased to 257 of these cities. This coverage remained constant during the period 1921-28; data were published annually for the same 257 cities. However, beginning in September 1929, the Bureau of Labor Statistics initiated monthly collection and publication of nonfarm housing statistics for all cities with 25,000 or more population. Between 1929 and 1933, the coverage of reports on building permits was extended to include all cities (about 820) having population of 10,000 or more. A further expansion in 1936 brought in all urban places—incorporated cities having population of 2,500 or more.

In addition, the Bureau of Labor Statistics subsequently conducted several special studies that widened further the scope and improved the usefulness of the building statistics.

In 1935, the Bureau of Labor Statistics, with the cooperation of the Federal Housing Administration, the Federal Home Loan Bank Board, and the Works Progress Administration, conducted a comprehensive survey of building permits to provide:

- (1) complete data for permits issued during 1928-35 in all cities of 10,000 inhabitants or more; and

- (2) historical annual data for years prior to 1920 for as many as possible of the large cities included in the Bureau of Labor Statistics reports after 1920. As a result data were obtained for a few cities from the year 1870 and for 25 cities from 1890. The number of localities increased steadily until it reached 344 for 1920.

Steady expansion of coverage led the Bureau of Labor Statistics to the preparation and publication of estimates of nonfarm housing units for the United States, beginning in 1939.

Another special study, the Defense Housing Survey, covered residential building operations during 1940, 1941, and 1942 in 148 defense-connected areas.

The National Bureau of Economic Research prepared similar estimates for 1920 to 1936 (Wickens) and for 1889 to 1919 (Blank). New estimates based on the 1940 Census of Housing were prepared by the Bureau of Labor Statistics covering the years 1930 to 1953.

A major revision in the series on nonfarm housing starts, completed in mid-1954, improved the earlier methods by the development of a new sample design using results of the 1950 Census of Housing and an expansion of the number of building-permit reporters to cover permits in all known permit-issuing places. The methodology introduced in 1954, including the sample design, is described in "Estimating National Housing Volume," BLS Bulletin No. 1168, chapter 2, pp. 8-15. With this improvement in methodology and coverage, the Bureau of Labor Statistics increased substantially the proportion of privately-owned starts that was based on direct reports, and, at the same time, reduced the estimates related to the nonpermit sector of the starts universe.

From 1954 to 1959 the Bureau's coverage of permit-issuing places was defined as the 6,600-

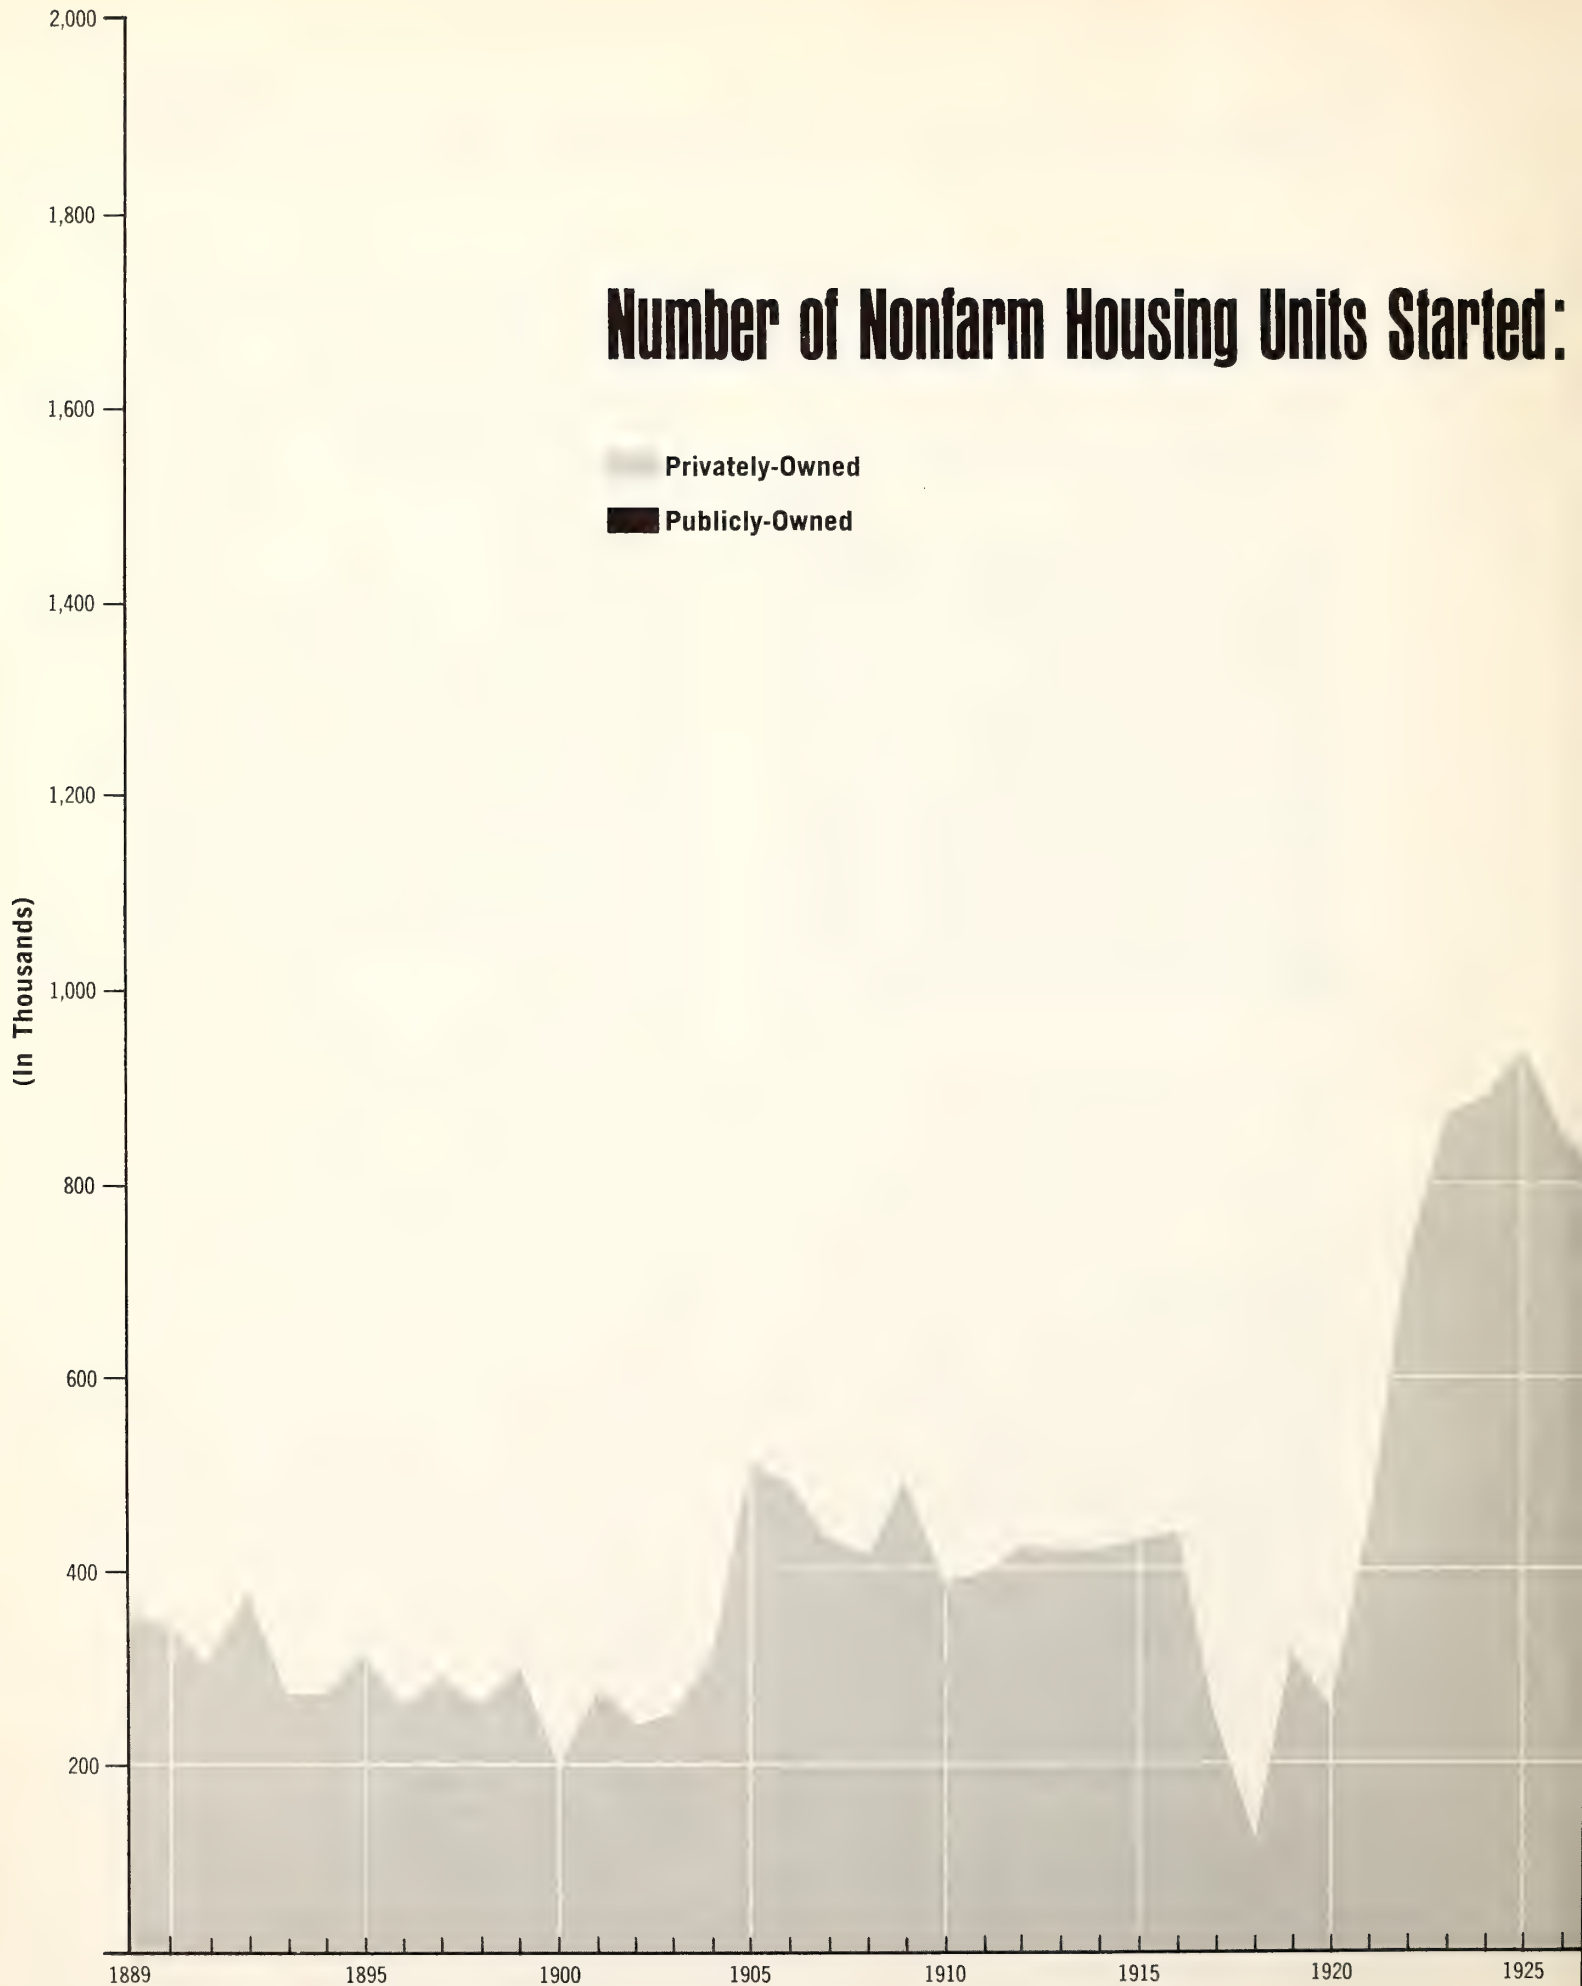

place series. This was the approximate number of permit-issuing places which had been identified in 1954. By 1959 the Bureau had identified about 7,300 permit-issuing places, but all published summaries from 1954 to 1959 were confined to the 6,600-place series because of the need for comparability.

A survey undertaken by the Census Bureau in 1959 identified about 3,000 additional permit-issuing places in the United States, bringing the total to about 10,000 permit-issuing places. In 1959 the nonpermit sector was also redefined. In 1962, another survey added about 2,000 more permit places, and the nonpermit sector was again redefined. In June 1964, the Bureau published revised data covering the annual figures for total private starts during the years 1945 to 1958. These revised data are analytically derived estimates. They represent a detailed reworking and evaluation of the best available data to produce improved figures. A complete report relating to these revisions is given in the Housing

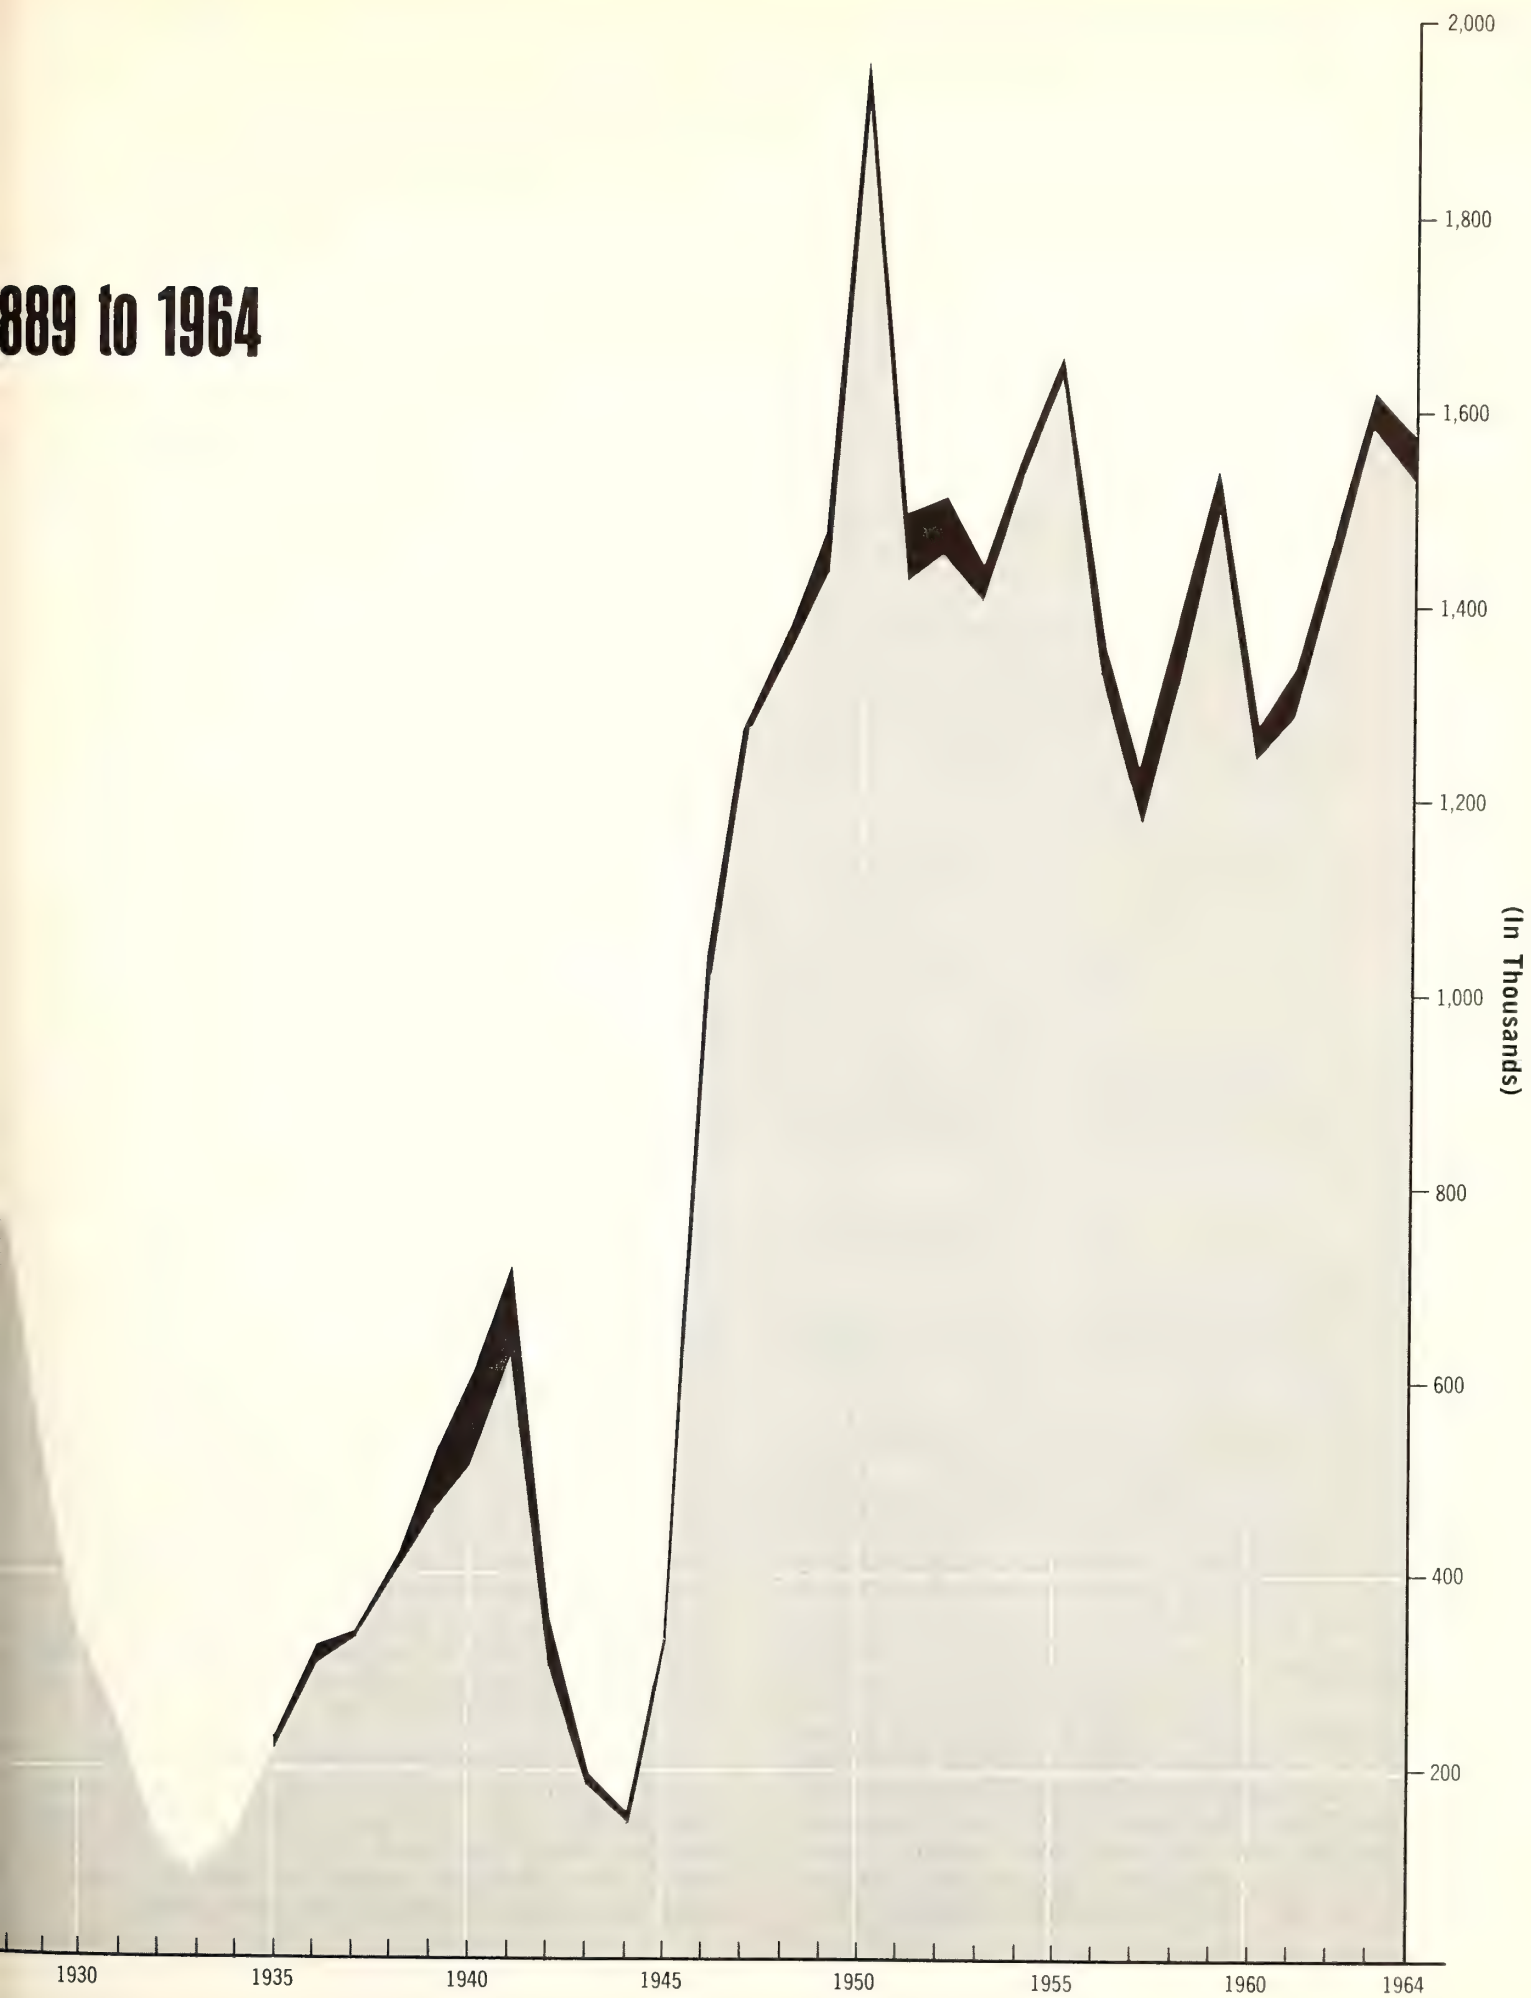

Starts C20-60 report published in June 1964.

For purposes of housing starts data, an estimate of permit authorizations is needed monthly. Generally, monthly permit reports are collected from 3,014 selected places, that is, from all places which authorized 50 or more housing units in 1959. However, in some States with limited construction activity, the cutoff was set at 20 units. The monthly estimate of units in permits authorized is derived by totaling the data reported from the 3,014 selected places and adding estimates for the remaining places. These estimates are based on monthly reports from about 500 places representing a stratified probability sample of the remaining permit-issuing places. At the close of each year, annual reports are received from each of the places that do not report monthly. These annual totals are compared with the sum of the 12 monthly estimates. The difference between the two sets of annual totals has ranged between 0.3 percent and 0.7 percent.

Number of Nonfarm Housing Units Started:

EXPLANATIONS

These tables provide, for the first time in one publication, a 76-year (1889 to 1964) historical record of the number of new housing units started in the United States. Beginning in 1959 data are shown both including and excluding farm housing. Data including farm housing were not available prior to 1959. On the other hand, data excluding farm

housing were designated in most of the sources as "Nonfarm Housing" and are shown from 1889 to 1964.

Tables A-1 and A-2 are identical except that table A-1 includes publicly-owned housing units and table A-2 excludes this category. Each table shows total units by type of structure, by inside and outside standard metropolitan areas and by region. Unfortunately, none of these breakdowns is available for all years prior to 1959. The one detail that is available for the greatest number of years covers structures built with 1 unit—that is, a single family detached residence. This 1-unit detail is available for each of the years prior to 1959, excepting the periods 1945 to 1958 and 1889 to 1899.

The estimates shown for 1889 to 1919 were prepared by David M. Blank; those from 1920 to 1929, by David L. Wickens. The urban housing category prepared by Wickens includes "rural environs under 2,500;" however, in subsequent review and revision by the Bureau of Labor Statistics, these rural environs were classified as rural nonfarm. Also, the Wickens report shows 938,000 units as the total number of housing units started in 1925 but this total was published as 937,000 units by the BLS in agreement with an earlier NBER publication, Bulletin No. 65. The Wickens' figures for 1930 to 1936 were revised upward by BLS. Starts were estimated by BLS from 1937 to 1959. Since 1959, the Bureau of the Census has collected monthly starts data through a sample of direct reports from builders.

Until the close of World War II, it was assumed that there was no difference between the number of units estimated for building-permit authorizations in urban places and for starts in urban places. The rural nonfarm estimate was divided into two segments beginning in October 1947—one representing all permit-issuing places and the other, all nonpermit areas. By 1954 the urban-rural nonfarm division was discontinued when the BLS initiated reporting of permits authorized in the entire permit sector of the universe—that is, in 6,600 places. Starts for the permit portion of the universe were estimated from reports collected from these 6,600 places; the nonpermit sector was estimated through the use of field surveys in a sample of nonpermit-issuing localities. In 1959 the permit sector was increased to 10,000 places by the Bureau of the Census and again to 12,000 places in 1963.

In June 1964, the Bureau published in the Housing Starts report, C20-60, its upward revision of annual figures for total privately-owned housing units started during the years 1945 to 1958. However, detail data, such as number of units by type of structure, are not available for these years.

1949 to 1958. "Nonfarm Housing Starts, 1889 to 1958," Bulletin No. 1260 (1959), pp. 17, 24, and 32.

1959 TO 1964

U.S. Department of Commerce, Bureau of the Census

1959 to 1964. "Housing Starts," C20-66-1 (March 1966), p. 5.

1959 to 1964. "Public Housing Starts: Area, Region and Type of Structure," Form 16-60 Annual data on file in the Bureau.

EXPLANATIONS

These tables represent an actual count of publicly-owned housing starts as reported by the Public Housing Administration, the Defense Department, the New York City Housing Authority, and other State and local housing authorities. Publicly-owned housing units were not reported separately until 1935. It is considered that the volume of permanent publicly-owned housing units prior to 1935 is insignificant. Also, housing provided under the Federal emergency programs, including those of World War II, consisted largely of units in temporary or converted structures and, therefore, are not included in the permanent units shown in tables A-3 and A-4.

Type of program data, i.e., Federal, State or local for publicly-owned housing is not available prior to 1949 and detail figures relating to type of structure are not available prior to 1959.

1945 TO 1964

U.S. Department of Commerce, Bureau of the Census

1945 to 1958: "Construction Cost," worksheet on file in the Bureau.

1959 to 1964. "Housing Starts," C20-66-1 (March 1966), p. 9.

EXPLANATIONS

The estimated construction cost of the new housing units started is available from 1889 to 1964. The figures for the privately-owned units are not reported directly but are based on permit valuations adjusted for understatement of construction cost and relationship between costs in permit places and nonpermit areas. They cover the cost of labor, material, and subcontracted work, and that part of the builder's overhead and profit chargeable directly to the building of the dwelling units started. Included are the costs of equipment which become an integral part of the housing unit and is essential to its general use. Excluded are the costs of land, site improvement, architectural fees, and sales profit. The figures for the publicly-owned units are based on contract award values or estimated construction costs for individual projects, as reported by the several agencies administering the various public housing programs.

1959 to 1964. 6-month moving average centered on 4th month for starts in permit-issuing places; worksheets on file in the Bureau.

EXPLANATIONS

The seasonal factors for privately-owned housing units started were developed by using the X-11 version of the Census Method II program. A description of the X-II version is available in the Bureau of the Census Technical Paper No. 15 (November 1965). Seasonal adjustments for housing starts are based on shifting periods; for the most recent years, the period is May 1959 to March 1965. Seasonal factors were developed separately for starts in permit-issuing places and in areas outside the permit-issuing places, in each of the 4 geographic regions with the exception of the nonpermit areas in the West. In this region irregularities in the data due to the small magnitudes of the figures made estimation of seasonals impracticable. Because of the irregularity of the starts series, it has not been possible to estimate working-day factors internally from the data. Hence, housing starts data are not adjusted for working-day influences. Seasonal indexes used to adjust private housing starts for 1964 are given in appendix B, table B-1, of the C20-66-1, issued in March 1966. Indexes used for earlier years are available in table 8 of C20-50, issued in August 1963.

1959 to 1964. "Housing Starts," C-20-66-1 (March 1966), table 2, p. 4; and 12 worksheets in the files of the Bureau.

EXPLANATIONS

The annual figures presented in tables A-10 and A-11 are taken from the C20-66-1 report. The sources used for the monthly figures are a series of 12 worksheets in the files of the Bureau.

Sources and Explanations for Table A-12

SOURCES

1959 TO 1964

U.S. Department of Commerce, Bureau of the Census

Annual figures

1959 to 1964. "Housing Starts," C20-66-1 (March 1966), table 3, p. 5.

Monthly figures

1959 to 1960. Worksheet on file in the Bureau.

1961 to 1964. "Housing Starts," C20-65-11 (December 1965), table 6, p. 8.

EXPLANATIONS

Housing units started in permit-issuing places include an unknown number of units started without the authority of a permit. It is estimated, however, that about 4 to 5 percent of the monthly totals presented in table A-12 were started without permit authorization.

Housing units started in permit-issuing places are treated as nonfarm housing even though a negligible number are located on farm properties.

¹Previously designated as "privately-owned nonfarm housing."

²All privately-owned housing units started in permit-issuing places are treated as nonfarm housing even though a negligible number are located on farm properties.

Multi-housing units

Residential Building Permits

SECTION

B

Introduction

Section B presents 13 series of statistical data related to new housing units authorized in permit-issuing places. Each series begins with data for 1964 and goes back in time as far as meaningful figures are available. The first of the series presents annual data at the national level for 76 years; the second, third, and fourth tables present data for States, regions, and standard metropolitan statistical areas back to 1954. Annual totals are shown covering 44 years for large cities and 15 years or less for all other permit-issuing places. Most of the monthly data tables cover only the 6 years from 1959 to 1964; the remaining monthly data tables begin with 1960 because data for 1959 are not available.

A building permit is a certificate, issued by a local governmental unit, which authorizes the holder to build, alter, or make repairs to a structure. This report is limited to permits which authorized the construction of new housing units. (In a small number of places, these permits are technically zoning permits rather than building permits.) While permits describe the proposed construction and its estimated cost, the detail included varies from place to place. A

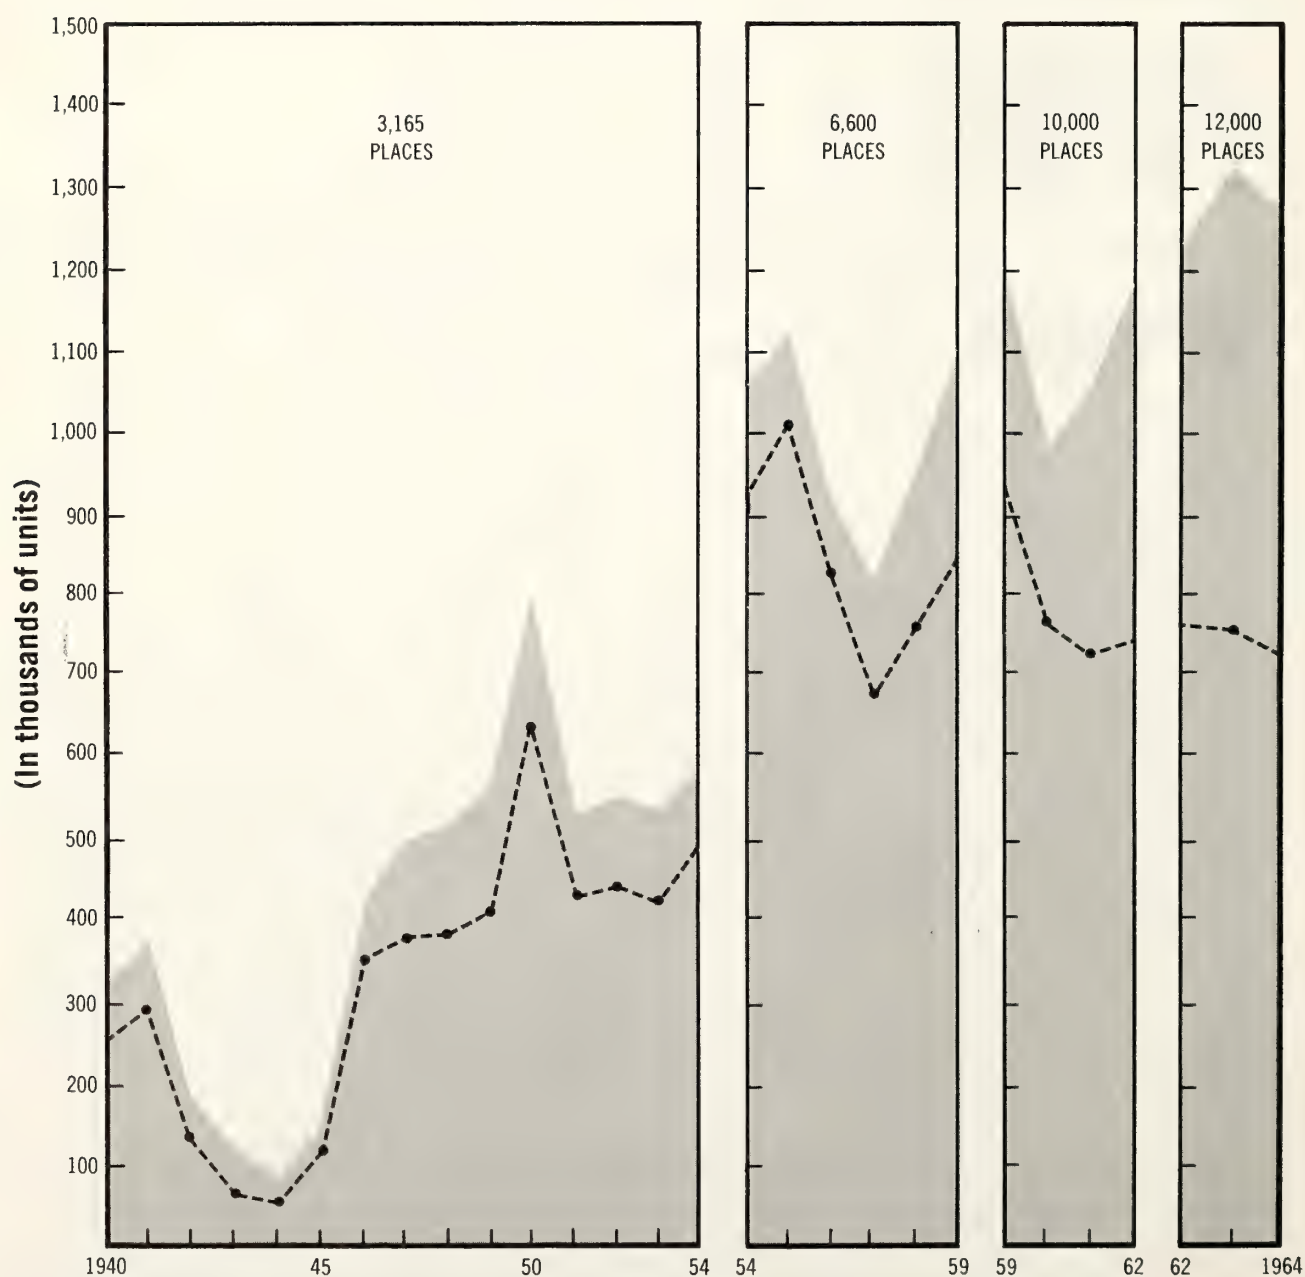

major purpose of a building-permit system is the enforcement of building codes and zoning restrictions related to public safety, fire prevention, sanitation, health, and land use. As cities, towns, and suburban areas have become more densely populated they have faced the necessity of increased safeguards to protect the public. This has caused an ever-increasing number of permit-issuing places to come into existence.

In recent years areas with local building-permit systems accounted for a major portion of all residential construction in the United States. Since 1954, when permit data were first available for virtually all permit-issuing places in the Nation, permit-authorized housing starts have comprised an increasing proportion of all residential construction activity. This fact reflects, at least in part, the continuing increase in the number of permit-issuing places. In 1964, about 84 percent of all privately-owned residential construction was in the 12,000 permit-issuing places covered in the survey. In 1961, 82 percent of this construction was in the 10,000 permit-issuing places; in 1958, 73 percent took place in 6,600 places covered; and in 1954, also in the 6,600 places, 69 percent, based on the 1945 to 1958

PERMIT - ISSUING PLACES

Section B

revision of starts prepared by the Bureau of the Census.

Prior to 1954, permit statistics were limited to estimates covering permits issued in urban places. The list of urban places, expanding rapidly from decade to decade as the population grew, increased from about 1,300 places in 1890 to about 3,500 places in 1950. For purposes of presenting time series on building permits and of estimating the permit segment of housing starts, the building-permit universe tabulated between 1954 and 1959, was held constant at approximately 6,600 permit-issuing places. Although no special attempt was made to increase the number of reporting places during this period, an additional 700 places with permit-issuing systems were identified. In 1959, a comprehensive survey was undertaken to identify all permit-issuing places in the United States. Approximately 3,000 additional places were identified, enlarging the permit-issuing universe to about 10,000 places. Again, in 1962, based on another comprehensive survey, about 2,000 additional permit-issuing places were identified. The 12,000-place universe was established as a result of these surveys. While some of the more than 5,000 additional places identified between 1954 and 1964 are areas with a relatively large volume of residential construction, most of the places report the issuance of only a few permit authorizations during any single year.

Prior to 1945, the estimates prepared for building permits in the urban places of the United States were used simultaneously for new housing units authorized in permit-issuing places and for housing starts. However, the number of housing units authorized by permits is not, in fact, the same as the number of units actually put under construction. In this regard, the continuing sample surveys made each month by the Bureau of the Census show that, for the nation as a whole, construction is ultimately undertaken for all but a very small percentage (about 2%) of housing units authorized by permits. The surveys also show that a major portion of the units normally get underway during the month the permit is issued, and most of the remainder are started within the following three months. On the other hand, in some individual places, the

normally close correspondence between permits issued and units put under construction may temporarily disappear. This is particularly true where an impending change in a zoning law or a building code, or a prospective annexation, provides an incentive for obtaining permits before the change occurs, although actual construction may not get underway immediately.

Since 1930, statistics on building permits have been compiled from reports submitted by local building-permit officials in response to monthly or annual mail surveys. During the decade preceding 1930, agents of the Bureau of Labor Statistics visited permit offices and compiled the data, since relatively few cities were involved and each of these used a different reporting form.

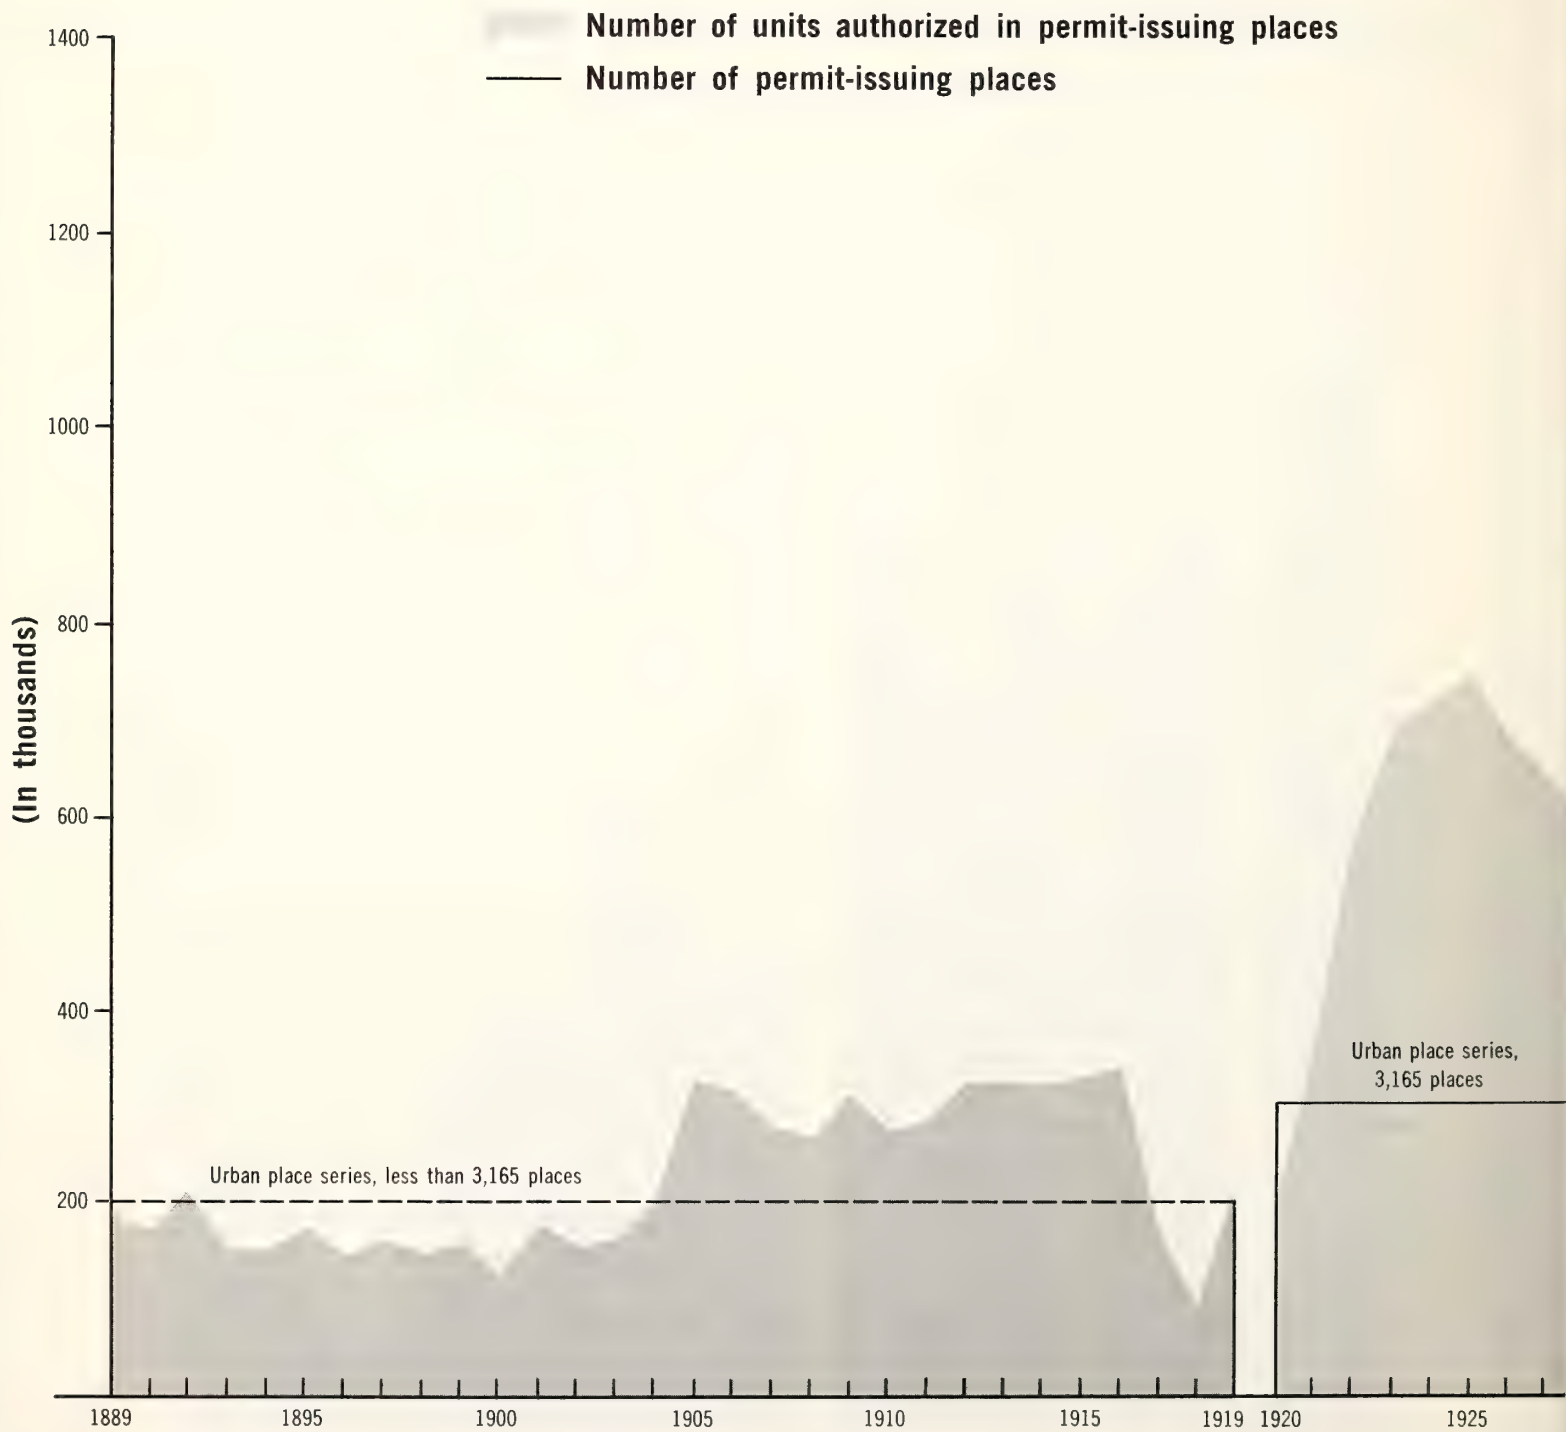

Users of data collected from permit-issuing places should be aware of the following limitations:

- (1) Boundary changes—New incorporations, revisions of SMSA definitions, changes in boundaries of permit-issuing places due to annexations, etc., may result in some problems of data comparability;
- (2) Understatement of value figures—Value figures reported are often substantially different from construction cost figures. Generally, the valuation of units reported by permit-issuing places is understated. The magnitude of this understatement varies from place to place and from time to time;
- (3) Response errors—In the current mail survey, response errors are overcome as much as possible by careful editing and resolution of problems through contact with permit officials.

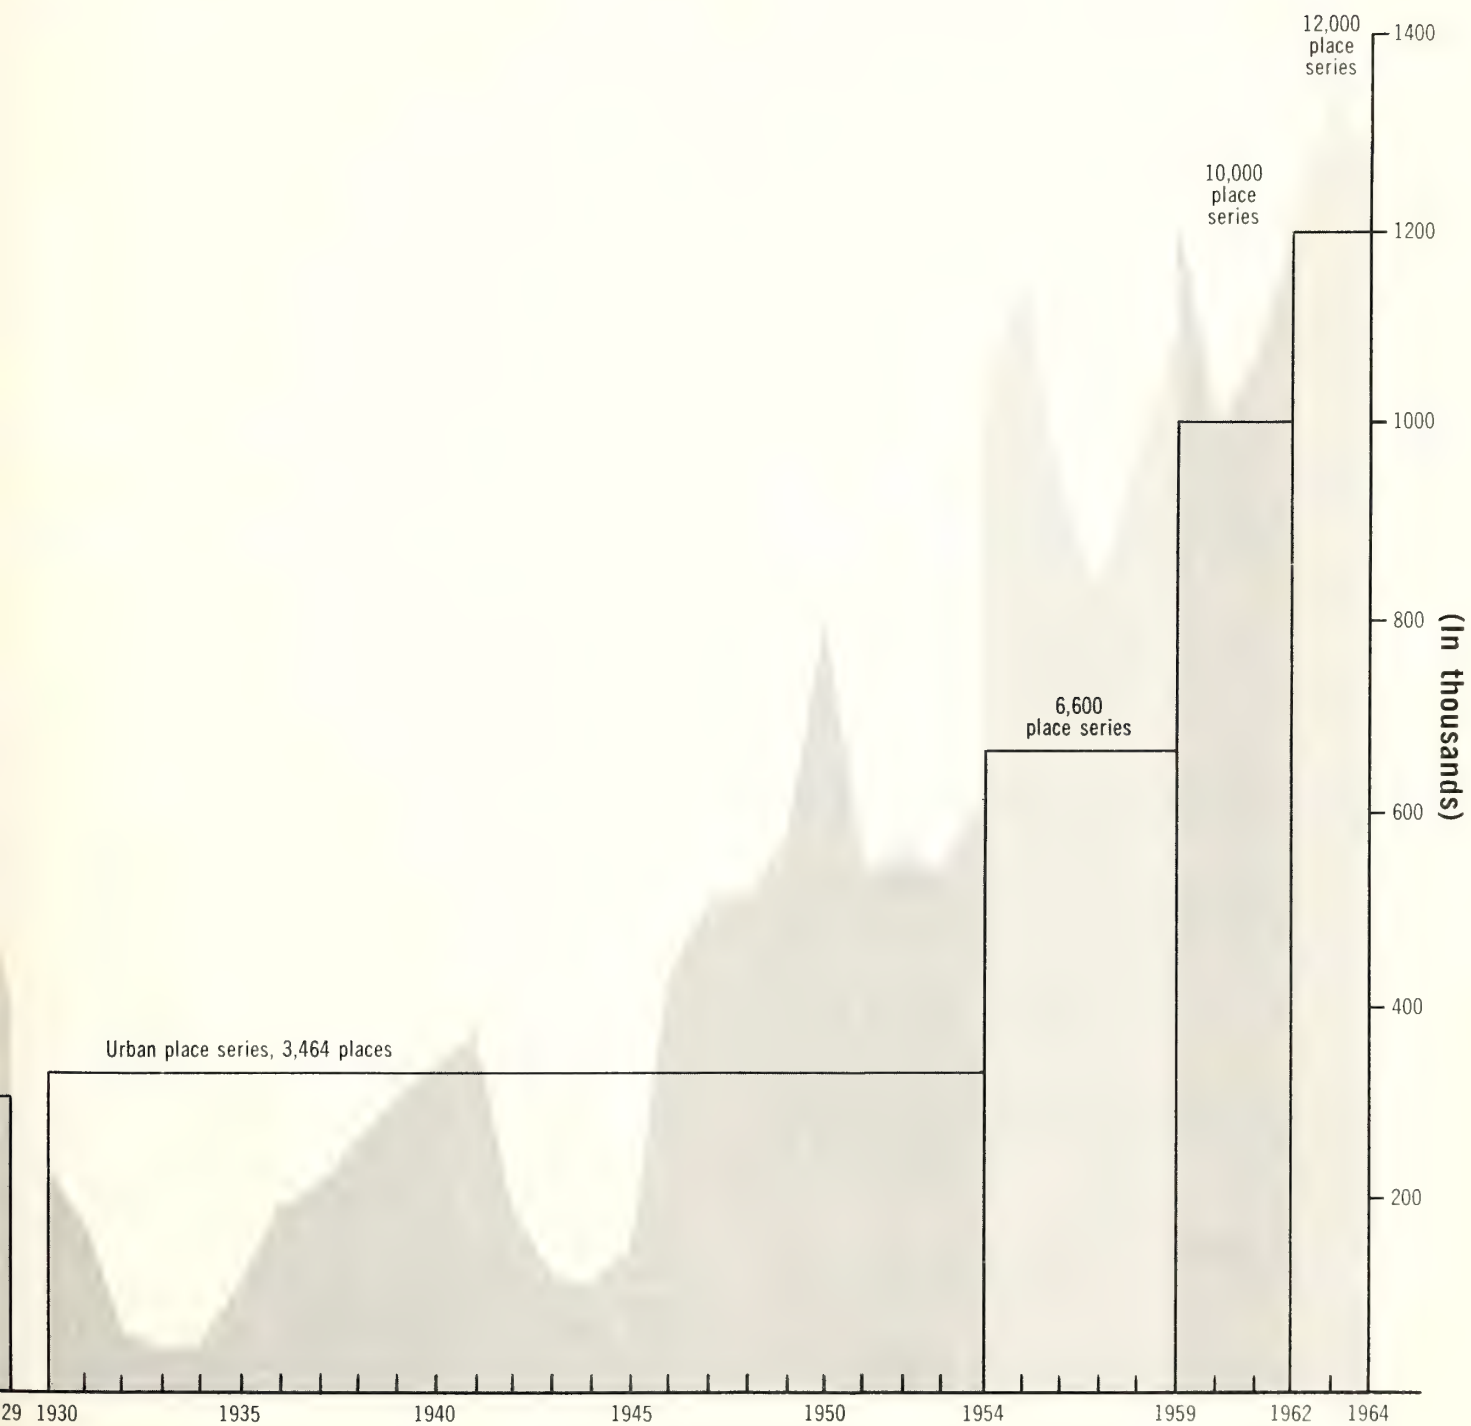

Some of the limiting factors apply consistently to long-term series, and to this extent, do not seriously impair an indication of trends.

Although the volume of privately-owned residential construction is reported by the local permit-issuing offices, the data for publicly-owned units are collected through monthly reports from Federal, State, and local agencies. These reports are based on contract awards or "proceed" orders. The criterion for classifying housing units as public is ownership of the facilities rather than the source of funds.

EXPLANATIONS

This table provides, for the first time, in a consolidated presentation a 76-year (1889 to 1964) historical record of the number and value of new housing units authorized by building permits and public contract awards in permit-issuing places. There are a number of breaks in the annual data shown for 1889 to 1964 with respect to the land area covered resulting from use of the various methods in estimating and collecting the data.

The actual number of urban places covered from 1889 to 1919 is not given in "The Volume of Residential Construction 1889 to 1950." At its maximum, this number was less than 3,165 places, and it was reduced to a smaller number at either the midpoint or the end of each decade. At its minimum the number was near the 1890 count which showed 1,348 urban places. The Wickens' report used 3,165 urban places for the decade 1920 to 1929. Beginning 1930 and continuing through 1952, the BLS data were based on the 3,464 urban places established in the 1940 Census of Population. In 1954 BLS discontinued the urban-place series by developing the 6,600-place series. This series was superseded by

the 10,000-place series in 1959, and in 1962, 2,000 places were added to the 10,000-place series bringing the 1962 to 1964 permit universe to 12,000 places.

Methods of developing the number and value of housing units authorized in permit-issuing places from 1889 to 1964 have varied considerably. Blank's data from 1889 to 1919 are estimates based on building-permit data collected by the Works Progress Administration. (See Blank's, "The Volume of Residential Construction, 1889-1950," for a detailed statement on methodology.) The Wickens' data from 1920 to 1929 were computed by showing the relation of aggregate dwelling units built during 1920 to 1929 to the increase in the number of families (occupied units) in reporting cities. These ratios, with certain modifications, were then applied to the increase in the number of families in un-

reported areas. (See Wickens' "Residential Real Estate," for a detailed description of methodology.) Data from 1930 to 1936 represent an upward revision of the Wickens' data made by the Bureau of Labor Statistics. Data from 1937 to 1953 were estimated by the Bureau of Labor Statistics. For methods used see "Technique of Preparing Major BLS Statistical Series," Bulletin No. 1168 (December 1954), Chapter 2. From 1954 to 1959 the Bureau of Labor Statistics collected the permit information through mail surveys made to all local building officials in the 6,600 permit-issuing places.

The data shown for 1960 to 1964 were collected by the Bureau of the Census through monthly or annual mail surveys. For methods used currently by the Bureau of the Census, see "Construction Reports, Building Permits, Summary Statistics 1964," C42-63 (July 1965).

¹Includes units covering public contract awards for temporary structures: 1952, 241 units; 1949, 1 unit; 1948, 226 units; 1947, 1,660 units; 1946, 90,283 units; 1945, 10,086 units; 1944, 18,718 units; 1943, 85,018 units; 1942, 53,460 units; 1941, 5,316 units.

²Includes valuation covering public contract awards for temporary structures, but valuation data are not available separately.

³The number of urban places to which the series relates is not given in Blank's report. At its maximum, it is less than 3,165 places and it is reduced to a smaller number at either the midpoint or the end of each decade.

⁴Defense housing totaling 15,000 units with value of 90 million dollars is not shown here.

EXPLANATIONS

The annual statistics presented for the four geographic regions are summations of State data shown in table B-3. In 1964, 25 percent of the approximate 12,000 permit-issuing places in the 50 States were located in the Northeast region, 40 percent in the North Central, 23 percent in the South, and 12 percent in the Western region. States included in each region are listed on Table B-2.

Table B-2. **Regions-New Housing Units Authorized in Permit-Issuing Places:**

EXPLANATIONS

This table presents summary statistics from 1954 to 1964 for each of 48 conterminous States and the District of Columbia. Statistics for Alaska cover the period 1960 to 1964, and for Hawaii, 1959 to 1964. Data for earlier years, 1940 to 1953, were examined but not included in this table, because they were not sufficiently comparable in coverage to those published in later years. They were limited to urban areas, while the 1954 to 1964 data were collected from all known permit-issuing places.

The coverage afforded by permit-issuing places varies from State to State. Hawaii is the only State in which permits are required for all residential construction. A county permit system covering all land area exists in four of the five counties in the State. The fifth county is conterminous with the Hansen's Disease Settlement and is administered by the State Department of Health. The data for construction in this county are included in the "public" sector of the report.

Except for three municipalities with a 1960 population of approximately 2,000, all of California is covered by municipal, county, or State building-permit departments. In those counties which do not have building-permit departments for their unincorporated areas, a permit must be obtained from the State Division of Housing. The data in this report cover these permits issued by the State of California.

Two other States with almost complete permit-issuing coverage in 1964 are New Jersey and Rhode Island. Based on the 1960 population census, approximately 99.5 percent of the population in New Jersey and about 99 percent of the population in Rhode Island lived in jurisdictions issuing building permits.

At the other end of the scale are some States, usually among those listed in the southern region, with less than two-thirds of their populations residing in permit-issuing places.

In Ohio the number of housing units is understated for some of the permit-issuing jurisdictions. The State government reserves the right to issue building permits authorizing construction of residential buildings with four housing units or more and all public-use buildings. This authority is delegated to local governments with "qualified" permit departments. A number of counties with these departments have been given "permanent" jurisdictions over all new residential buildings. Although many of the places in Ohio do not have final authority to authorize construction of buildings with four or more housing units, some issue building or zoning permits, and report these data to the Bureau of the Census. Other places do not report them. During the past few years, the State authorized construction of approximately 1,000 housing units annually in permit-issuing places which do not report buildings with four or more housing units to the Bureau of the Census. The statistics in this report do not cover the permits issued by the State of Ohio.

Supplemental statistics for two transition years, 1959 and 1962, are presented to link the 6,600-place series to the 10,000-place series and the 10,000 to the 12,000-place series, respectively.

Except for the actual data for Hawaii and the District of Columbia, the statistics for the 1959 transition year are estimates derived by the following procedure:

For each State, a ratio is calculated measuring the relation between the totals for the 3,014-place universe and the 10,000-place universe for the year 1960.

The ratio, thus obtained, is applied to the total of the respective State in the 3,014-place universe for 1959.

RESIDENTIAL BUILDING PERMITS

The resulting figure, with minor adjustments made in some cases, represents the individual State estimate for the 10,000-place series.

The State figures for the transition year 1962 represent the sum of the reported data for the 10,000-place series and the data compiled from supplemental unpublished reports received from the 2,000 additional places newly identified as permit-issuing in 1962.

Table B-3. States-New Housing Units Authorized in Permit-Issuing Places: Annually, 1954 to 1964

Because of rounding, detail may not equal total. "-" Represents zero. "NA" Not available.

EXPLANATIONS

A standard metropolitan statistical area is a county or group of contiguous counties (except in New England) which contains at least one central city of 50,000 or more inhabitants or "twin cities" with a combined population of at least 50,000. In addition to the county or counties, containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are

essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities rather than counties are the units used in defining an SMSA.

In addition to SMSA's, two standard consolidated areas (SCA's) have been established for statistical reporting. These involve the metropolitan complexes around New York and Chicago. Several contiguous SMSA's and additional counties with strong inter-relationship with the areas, combine to establish the New York-Northeastern New Jersey and Chicago-Northwestern Indiana Standard Consolidated Areas, respectively. The former is identical to the New York-Northeastern New Jersey SMSA defined in 1950, and the latter roughly corresponds (two counties having been added) to the Chicago SMSA defined in the same year.

The titles and definitions of the SMSA's are established by the Bureau of the Budget with the advice of the Federal Committee on Standard Metropolitan Statistical Areas. This committee is composed of representatives of major statistical agencies of the Federal Government. Detail criteria followed in establishing SMSA's are included in the Bureau of the Budget publication, Standard Metropolitan Statistical Areas, 1964, U.S. Government Printing Office, Washington, D.C. 20402.

Summary data for 219 of the 222 SMSA's established as of October 1964 are presented in this table. Excluded are the three SMSA's in Puerto Rico for which data are not available. The current and prior area definitions, as they applied during the period shown by the data, are presented for each SMSA. Summary statistics for 24 of the 219 SMSA's cover the period 1954 to 1964; for 189 SMSA's, 1960 to 1964; and for six SMSA's, 1964 only.

The statistics for SMSA's are influenced by two types of changes, which may impose problems in the comparison of data covering extensive periods of time. They are (1) changes in the permit-issuing universe and (2) changes in SMSA definitions.

Changes in the permit-issuing universe as a result of the continuing search for new places with permit-issuing jurisdictions have enlarged the universe from 6,600 places to 10,000 places in 1959, and, further, to 12,000 places in 1962. In order to show the relationship of these three place series, supplemental statistics are presented for the link years 1959 and 1962. The derivation of estimates for the 1959 link year first assumes that, for each

of the 24 SMSA's, the increase in the number of units in 1959 was equal to the number of units reported in the new permit-issuing places listed for each area. The new data, then, were added to the 1959 total reported for the 6,600-place series to establish the 1959 total for the 10,000-place series. Several of the areas reported no new permit-issuing places. In these instances, the number of units in 1959 was identical for both the 6,600-place series and the 10,000-place series. The SMSA data for the transition year 1962 are the sum of the reported data for 1962 plus the data compiled from supplemental unpublished reports received from the 2,000 additional places newly identified as permit-issuing in 1962.

In the transition from the 10,000 to the 12,000-place series, 122, of 212 SMSA's defined in 1961, increased their statistics by approximately 16,500 housing units. Comparable data in the transition from the 6,600 to the 10,000-place series for 169

SMSA's defined in 1950 are not available. As of 1964, 107 of the 219 SMSA's had complete or virtually complete permit-issuing coverage of their areas.

Changes in SMSA definition result from the periodic review of population centers and the surrounding environs made by the Bureau of the Budget. Between 1950 and 1961, this type of change resulted in the addition of 42 towns and deletion of five towns in 13 New England SMSA's. Changes to 28 other SMSA's added 32 counties and deleted 14 others (of which six formed the basis for three new SMSA's). From 1962 to 1964, area redefinition affected 60 SMSA's and included the addition of 38 towns to 15 New England SMSA's, the addition of 63 counties to 42 other SMSA's, and the deletion of one county each from three SMSA's. The above changes are not all incorporated in table B-4, because published data for years prior to 1960 are available only for 24 of the 219 SMSA's. Overlapping data are shown where definitions changed.

Table B-4. Standard Metropolitan Statistical Areas—New Housing Units Authorized in Permit-Issuing Places: Annually, 1954 to 1964

The two standard consolidated areas and the 219 standard metropolitan statistical areas in the continental United States and in Hawaii, are established in the 1964 list of area titles and definitions, as amended to October 27, 1964, by the Bureau of the Budget

Because of rounding, detail may not equal total. "—" Represents zero. "NA" Not available. "Z" Less than 500 units or \$500,000.

EXPLANATIONS

On April 1, 1960, there were 130 cities of 100,000 inhabitants or more in the United States, excluding the Commonwealth of Puerto Rico. For each of the 130 cities, table B-5 presents annual statistics (if available) covering the number of housing units authorized for the period 1921 to 1964.

RESIDENTIAL BUILDING PERMITS

The annual statistics include both privately-owned and publicly-owned housing units. However, data are not shown separately for these two categories because figures on public housing prior to 1950 are not available by individual places except for a few areas. Public housing data by place for 1950 and subsequent years are presented in table B-7.

The 130 cities in this table are listed alphabetically. For the ranking of these cities by population size, the user is directed to the 1960 Census of Population, Volume I, Part A, table 28, pp. 1 - 66 and 1 - 67, Bureau of the Census (1961).

EXPLANATIONS

Table B-6 presents statistics (if available) back to 1950 for each of the 12,000 permit-issuing places in the United States which is known to have issued building permits during the year 1964. This table provides, for the first time, a 15-year historical record of the number of housing units authorized by building permits or public housing construction contract awards. In the places where public housing is included, the housing unit figures shown for that area represent the sum of the publicly-owned housing units and the privately-owned housing units. These combined figures are indicated by the use of the symbol "&," which refers the user to the number of public housing units presented in table B-7. Although every effort has been made to present comparable data for each place from year to year, this was not always possible since the source data available are incomplete. The symbol "#" on place names in this table indicates that detailed information on area covered is presented in appendix C-2.

From 1950 to 1953, the number of new dwelling units for which building permits were issued, or public housing contracts awarded, was reported by approximately 6,000 individual localities. Figures are given each year for the places that provided building-permit information for at least nine months during the year. During 1952 and 1953, the BLS made a special effort toward complete reporting from all building-permit systems; 1,000 new places were added bringing coverage to about 7,000 places for the years 1954 and 1955. These 7,000 places were increased to 7,300 places during the year 1956 to 1959. However, for the purpose of comparability, summary data published for the years 1954 to 1959 cover consistently the series known as that for 6,600 permit-issuing places.

In July 1959 when the Bureau of the Census assumed responsibility for the construction statistics program, the dimensions of the building-permit universe were re-examined. A survey was undertaken in 1959 to identify all permit-issuing places in the United States. Approximately 3,000 additional places were identified, bringing the total of permit-issuing places to about 10,000 places. Annual reports covering individual places for 1960 and 1961 were collected from these 10,000 places. In 1962, as the result of another special survey, 2,000 additional permit-issuing places were identified, bringing the total number of places to 12,000 for the years 1962 to 1964.

This 12,000-place list, published in the Bureau of the Census C40-74 report for 1964 served as the control list for this 15-year history. However, the

use of this list presents two types of problems. In the first place, changes in the boundaries of certain permit-issuing places over the 15-year period have been significant. Wherever possible comparable data are shown. Annexations, mergers, divisions due to new incorporations, and other factors affecting the area covered are given in appendix C-2. A small number of relatively inactive permit-issuing places listed in each of the annual publications from 1950 to 1963 may not appear in subsequent annual publications. These places were dropped because they may have ceased to issue building permits, or because they failed for several years to provide reports to the Bureau of Labor Statistics (1950 - 1959) or to the Bureau of the Census (1960 - 1963). When dropped from the list of permit-issuing places, these jurisdictions were included in the nonpermit sector in the reports issued by the Bureau of the Census.

From 1950 to 1959 information providing the number of housing units authorized was reported directly to the Bureau of Labor Statistics by local building officials. This information was summarized and published annually by BLS. Although some of these annual reports are now out of print, they are the direct source of the figures shown here for the 10-year period, 1950 to 1959.

From 1960 to 1964, the Bureau of the Census collected the data presented in this table by two mail surveys - a monthly, covering about 4,000 of the 12,000 permit-issuing places, and an annual covering the remaining 8,000 places which do not report monthly.

Each county place name that is shown in the stub is classified in one of the following four categories:

County, unincorporated area

County, unincorporated area plus additional places #

County, part of unincorporated area #

County, remaining area

The symbol "#" used refers the user to Appendix C-2, where an explanatory statement is given.

The information on construction contract awards for publicly-owned housing was obtained from reports supplied by Federal, State, and local agencies responsible for public housing projects designed to provide family accommodations, including housing for families of military personnel.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Wherever there is a change in definition, the totals presented in table C-4 differ from the sum of the figures for

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. // See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“_” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. [#] See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964-Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964-Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. *This

Permit-Issuing Places: Annually, 1950 to 1964—Continued

Place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. *This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

[illegible]

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964-Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964-Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Whenever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. [#] See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places— New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“_” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. / See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“–” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. *This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. // See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. ¶ See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. // See Appendix C-2 for statement regarding coverage. "G" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. * Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. [#] See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. // See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places— New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. *This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. *This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. / See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places— New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero "T" Data cover period more than 8 months but less than 12 months "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. †This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“_” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "8" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. †This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. [#] See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places— New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

" " Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "8" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. // See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. [#] See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

[illegible]

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. *This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“–” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. *This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. †This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. [#] See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964-Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. // See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. * Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. *This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. * See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for use in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964-Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“_” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

[illegible]

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. ^a See Appendix C-2 for statement regarding coverage. ^b Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. / See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“—” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1954. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "8" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "8" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. / See Appendix C-2 for statement regarding coverage. "X" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. ^a See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"-" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

“-” Represents zero. “T” Data cover period more than 8 months but less than 12 months. “S” Does not meet publication standards because reporting is for 8 months or less, or annual report not received. “X” Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places- New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols: "—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. See Appendix C-2 for statement regarding coverage. "8" includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. +This

Table B-6.—Individual Places—New Housing Units Authorized

The land area delineated for each of the 219 standard metropolitan statistical areas in this table conforms to the definition established by the Bureau of the Budget, as amended to October 1964. The same coverage is extended back to 1950 for ease in presentation and comparability. Changes in definitions established prior to 1964 are shown in table B-4. Wherever there is a change in definition, the totals presented in table B-4 differ from the sum of the figures for

the same SMSA shown in this table. See Appendix C-1 for alphabetical listing by State of the 12,000 permit-issuing places shown in the stub of this table. Stub symbols: *Building permit systems cover the entire land area of the county for 1964. **97.0 to 99.9 percent of county population in 1960 lived in places which were permit-issuing in 1964. *This

in Permit-Issuing Places: Annually, 1950 to 1964—Continued

place is on the list of 3,014 selected permit-issuing places which constitute the source for the statistics shown monthly in tables B-11, B-12, and B-13. # See Appendix C-2 for statement regarding coverage. "&" Includes public housing units for which contracts were awarded; for number of public housing units by place, see table B-7. Data symbols:

"—" Represents zero. "T" Data cover period more than 8 months but less than 12 months. "S" Does not meet publication standards because reporting is for 8 months or less, or annual report not received. "X" Not applicable because not identified as permit-issuing in designated year.

EXPLANATIONS

Table B-7 presents all public housing statistics reported from 1950 to 1964 by the Public Housing Administration, Department of Defense, New York City Housing Authority, and other State and local housing authorities. The housing units shown in this table are based on contract awards for publicly-owned housing projects for which contracts were awarded during the year, wherever located, in either permit-issuing places or nonpermit areas. The public units shown in this table, when located in permit-issuing places, are added to the number of private units reported by local building officials and the combined total is shown in table B-6. If public units are included in the totals for individual places, this is indicated by the symbol "&".

Usually separate listings for the nonpermit areas are not shown for places with fewer than 25 public units during any one year. Combined totals for these small projects are shown for each State under "Rest of State."

This table is arranged alphabetically by State and by individual place within the State.

"_" Represents zero.

Sources and Explanations for Table B-8

SOURCES

1959 TO 1964

U.S. Department of Commerce, Bureau of the Census

1959 to 1964. "Construction Reports, Housing Starts, May 1965," C20-65-5 (June 1965), table 6, pp. 12-13.

Statistician, Bureau of the Census, Washington, D.C., 20233.

Seasonal adjustments for building permits are based on data for shifting periods; for 1964, the period is January 1959 to March 1965. The unadjusted data for January 1959 through December 1964 are given in table B-9. Seasonal factors were developed separately for permits issued by region and by units in structures with 1 unit, 2 to 4 units, and 5 units or more.

EXPLANATIONS

The seasonal factors for building permits were developed using the X-11 version of the Census Method II program. The background and rationale of Method II is described in "Electronic Computers and Business Indicators" by Julius Shiskin, National Bureau of Economic Research, Occasional Paper No. 57, 1957. A description of the X-11 version is available in the Bureau of the Census Technical Paper No. 15. Additional information on X-11 may be obtained from Julius Shiskin, Chief Economic

The seasonal adjustment at annual rate for building permits takes account of the effect of working days—defined as Monday through Friday, excluding eight holidays (New Year's Day, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Veterans' Day, Thanksgiving, and Christmas). Each monthly total is divided by the number of working days in the month to arrive at a daily average for the month. The seasonal adjustment factors are then applied to the daily average, and the result multiplied by the number of working days in the year.

Sources and Explanations for Table B-9

SOURCES

1959 TO 1964

U.S. Department of Commerce, Bureau of the Census

1959 to 1964. "Construction Reports, Housing Starts, May 1965." C20-65-5 (June 1965), table 6, pp. 12-13. Annual data.

Worksheets in Bureau files. Monthly data.

EXPLANATIONS

The unadjusted figures presented in this table for new housing units authorized in permit-issuing places are the source of the seasonally adjusted annual rate data presented in table B-8. Also, these figures are related to housing starts in permit-issuing places. The units started in permit-issuing places are given in table A-11.

Housing units authorized by local building permits relate to the issuance of permits rather than to the actual start of construction. They do, however, provide some indication of activity in residential building in advance of the start of actual construction. Although construction is started on most residential buildings in the same month in which the permit is

issued, several months or more may pass from the time a permit is issued to the start of construction. In less than one percent of the total units authorized, permits issued are not used at all but are permitted to lapse. The 12,000 areas with local building-permit systems for which figures are given in this report account for a major portion of residential building in the United States. For the country as a whole, about 84 percent of the private housing units were constructed in areas of this permit-issuing universe in 1964.

During 1963 and 1964 the total authorizations reported monthly in this table were obtained, in the first instance, by cumulating reports from approximately 3,500 of the more active permit-issuing places in the country, with estimates for the remaining 8,500 places prepared from a stratified sample of 500 of these places. When final annual data are established, the monthly estimates are revised to reflect the revisions reported in the annual data. For earlier years, 1959 to 1963, this series relates to the 10,000 places identified as permit-issuing in 1959. In 1963 (the overlap year), the number of housing units authorized in the 10,000-place series is given along with the number in the 12,000-place series to provide the user with a basis for linking the two series.

Sources and Explanations for Table B-10

SOURCES

1959 TO 1964

U.S. Department of Commerce, Bureau of the Census

January 1959 to April 1960. "Construction Reports, Building Permits," C49-1 (September 1960), table 1, p. 5.

May 1960 to December 1964

Annual data

1960 "Construction Reports, Building Permits," C42-14 (August 1961), table 1, p. 4 (rev.).

1961 "Construction Reports, Building Permits," C42-28 (September 1962), table 1, p. 4.

1962 "Construction Reports, Building Permits," C42-43 (October 1963), table 1, p. 5.

1963 "Construction Reports, Building Permits," C42-53 (July 1964), table 1, p. 9.

1964 "Construction Reports, Building Permits," C42-63 (May 1965), table 1, p. 7 (rev.).

Monthly data

Worksheets on file in the Bureau.

EXPLANATIONS

The figures presented in table B-10 are taken from 2 sources: first, the total units shown monthly (1959 to 1964) in table 6 of the C20-65-5 report. These figures incorporate slight revisions of data shown in table 1, of the C42 monthly series, to reconcile the monthly data for total units authorized with the annual data published in the C42 reports. Second, worksheets on file in the Bureau. The worksheets extend the C20-65-5 revision of total units to cover the type of structure detail and all "valuation" figures monthly from 1959 to 1964. Publicly-owned housing data show slight revisions due to inclusion of some late reports. The C42 monthly figures are preliminary and therefore do not include the final revisions reflected in the C42 annual reports.

Table B-10 gives figures from the 10,000-place series for the months and years 1959 to 1963. In 1963, the 12,000-place series replaced the 10,000-place series. Thus for 1963 (the overlap year) data are presented for both the 10,000-place series and the 12,000-place series in order to provide the user with a basis for linking the two series.

Table B-10. **United States—New Housing Units Authorized in Permit-Issuing Places:**
Annual and Monthly, 1959 to 1964

Because of rounding, detail may not equal total.

Coverage, year, and month	Number of housing units						Valuation (millions of dollars)					
	Total	Private (permit-authorized)				Public (contract award)	Private (permit-authorized)					Public (contract award)
		Total	In structures with—				Total	Total	In structures with—			
			1 unit	2-4 units	5 units or more				1 unit	2-4 units	5 units or more

Sources and Explanations for Table B-11

SOURCES

1959 TO 1964

U.S. Department of Commerce, Bureau of the Census

January 1959 to April 1960. "Construction Reports, Building Permits," C49-1 (September 1960), table 2, p. 5.

May 1960 to December 1964. "Construction Reports, Building Permits," C42, annual and monthly report series.

Annual data

1960-C42-14 (1961), table 3, p. 4 (rev.).

1961-C42-28 (1962), table 3, p. 4.

1962-C42-43 (1963), table 3, p. 7.

1963-C42-53 (1964), table 5, p. 25.

1964-C42-63 (1965), table 5, p. 23 (rev.).

Monthly data

May to December 1960 - C42-1 to C42-8, table 2, p. 4.

January to December 1961 - C42-9 to C42-13, table 2, p. 4, and C42-15 to C42-21, table 2, p. 5.

January to December 1962 - C42-22 to C42-27 and C42-29 to C42-34, table 2, p. 5.

January to December 1963 - C42-35 to C42-42, table 2, p. 5, and C42-44 to C42-47, table 2, p. 6.

January to December 1964 - C42-49 to C42-52 and C42-54 to C42-61, table 2, p. 6.

EXPLANATIONS

The 3,014 permit-issuing places furnishing these data comprise the more active permit-issuing places selected from the 10,000-place universe established in 1959. National summaries of the monthly and annual data reported from these places form the basis for the statistics in this table. This sample consists generally of places where permits were issued during 1959 for at least 50 new housing units. For Alaska, Idaho, Maine, Mississippi, Montana, New Hampshire, North Dakota, South Dakota, Vermont, and Wyoming, the sample includes places which issued 20 to 49 new housing units in 1959.

The annual totals for the 3,014-place series include late revisions which are not reflected in the monthly data.

The extent of activity in the 3,014-place series is shown in the text tables for tables B-12 and B-13, which give comparisons of the annual totals for the United States, State, and each SMSA summarized for the 3,014-place series with the corresponding totals compiled from the 10,000-place series for 1959 to 1962, and the 12,000-place series for 1963 and 1964. On a nation-wide basis, during 1960 to 1964, the 3,014-place series accounted for from about 86 percent to 92 percent of the total new residential units authorized in all permit-issuing places.

Table B-11. United States—New Housing Units Authorized in 3,014 Selected Permit-Issuing Places:
Annual and Monthly, 1959 to 1964

Because of rounding, detail may not equal total. "—" Represents zero. "Z" Less than 500 units.

Year and month	Number of housing units (thousands)						Valuation (millions of dollars)

1959 TO 1964

U.S. Department of Commerce, Bureau of the Census

January 1959 to April 1960. "Construction Reports, Building Permits," C49-1 (September 1960), pp. 9-29.

May 1960 to December 1964. "Construction Reports, Building Permits," C42, Annual and Monthly report series.

Annual data

1960-C42-14 (1961), table 5, p. 6 (rev.).

1961-C42-28 (1962), table 5, p. 6.

1962-C42-43 (1963), table 3, p. 7.

1963-C42-53 (1964), table 5, p. 25.

1964-C42-63 (1965), table 5, p. 23 (rev.).

Monthly data

May to December 1960 - C42-1 to C42-8, table 3, p. 5.

January to December 1961 - C42-9 to C42-13, table 3, p. 5, and C42-15 to C42-21, table 3, p. 6.

January to December 1962 - C42-22 to C42-27 and C42-29 to C42-34, table 3, p. 6.

January to December 1963 - C42-35 to C42-42, table 3, p. 6, and C42-44 to C42-47, table 2, p. 6.

EXPLANATIONS

Table B-12 presents annual and monthly statistics for 1959 to 1964 for each of the 50 States and the District of Columbia. The relative importance of the 3,014-place series as compared with the 10,000-place series (1959 to 1962) and the 12,000-place series (1963 and 1964) is shown in the text table below.

The annual totals reported from the 3,014-place series reflect considerable variation in the proportion of all permit-authorized construction which they cover. For example, during the year 1964, the 3,014-place series accounted for 100 percent of the number of new housing units authorized in Hawaii, while, for the same year, it accounted for only 56 percent of new units in South Carolina and West Virginia. In 30 of the 50 States, the 3,014-place series accounted for more than 80 percent of the total of new units authorized; and in 12 States, between 70 and 80 percent; and in only 8 States was the ratio less than 70 percent.

The annual State totals shown for the 3,014-place series include late revisions which are not reflected in the monthly data.

New Housing Units Authorized in the 3,014 Place Series as a Percent of Total Units Authorized

Sources and Explanations for Table B-13

SOURCES

1960 TO 1964

U.S. Department of Commerce, Bureau of the Census

January 1960 to April 1960. "Construction Reports, Building Permits," C49-1 (September 1960), pp. 30-33, for 42 areas. Data for the remaining 19 areas compiled from machine runs in Bureau files.

May 1960 to December 1964. "Construction Reports, Building Permits," annual and monthly C42 report series. Data for May 1960 through December 1963 cover 42 SMSA's; data for the remaining 19 areas compiled from machine runs in Bureau files.

Annual data

- 1960-C42-14 (1961), table 7, p. 10 (rev.).
- 1961-C42-28 (1962), table 7, p. 11.
- 1962-C42-43 (1963), table 5, pp. 20-22.
- 1963-C42-53 (1964), table 6, pp. 26-28.
- 1964-C42-63 (1965), table 6, pp. 24-27 (rev.).

Monthly data

- May to December 1960 - C42-1 to C42-8, table 4, p. 6.
- January to December 1961 - C42-9 to C42-13, table 4, p. 6, and C42-15 to C42-21, table 4, p. 7.
- January to December 1962 - C42-22 to C42-27 and C42-29 to C42-34, table 4, p. 7.
- January to December 1963 - C42-35 to C42-42, table 4, p. 7, and C42-44 to C42-47, table 3, p. 7.
- January to December 1964 - C42-49 to C42-52 and C42-54 to C42-61, table 3, pp. 8-9.

EXPLANATIONS

This table presents annual and monthly statistics for 61 selected standard metropolitan statistical areas (SMSA's) covering the period 1960 to 1964. Forty-two of the 61 SMSA's were selected because they issued permits for construction of 5,000 or more units in 1959. The 1959 data were estimates. They were never published, but were used only as a basis to establish the 1960 monthly reporting system. The remaining 19 SMSA's were selected in 1963, because they issued permits for construction of 3,000 or more units in 1962. Two exceptions were made to this rule. Akron, Ohio, issued permits in 1962 for only 2,797 units but was included because the 1960 and 1961 level was above 3,600 units. The other exception was Anaheim-Santa Ana-Garden Grove, Calif., which was designated as an SMSA in 1964, during which 26,882 units were authorized. This area was formerly included in the Los Angeles-Long Beach, Calif., SMSA. The relative importance of the 3,014-place series as compared with the 10,000-place series (1959 to 1962) and the 12,000-place series (1963 and 1964) is shown in the text table on next page.

The places on the list of 3,014 selected permit-issuing places generally accounted for a substantial proportion of all permit-authorized construction in the 61 selected SMSA's in 1964. In 29 of the 61 SMSA's, the selected places accounted for 95 percent or more of the new residential construction authorized within all permit-issuing places in those areas; in 30 other SMSA's, they accounted for between 80 and 94 percent; and, in only 2 areas did they account for less than 80 percent.

The annual totals may include late revisions, and, hence, may not necessarily equal the sum of the monthly data.

LIMITATIONS TO 1964 DATA

The 1964 statistics for 19 of the 61 SMSA's shown in table B-13 reflect the effect of area redefinition announced in 1964 by the Bureau of the Budget. The area of 17 of the 19 SMSA's was increased and for the remaining two, decreased. The following table lists the 19 SMSA's and the net change in number of units

for each in 1964, based on the revised definition as applied to the 3,014-place series. The monthly data for 1964 reflect these changes. (Note: The 1961 statistics for none of the 61 SMSA's were affected by the 1961 area redefinitions.)

Changes in the Total Number of Housing Units in 1964 for 19 SMSA's, Reflecting Changes in the 1964 Definitions

Table B-13. **Standard Metropolitan Statistical Areas-New Housing Units Authorized in 3,014 Selected Permit-Issuing Places: Annual and Monthly, 1960 to 1964-Con.**

Because of rounding, detail may not equal total. "-" Represents zero.

Area, year, and month	Number of housing units						Valuation (thousands of dollars)					
	Total	Private (permit-authorized)				Public (contract awards)	Total	Private (permit-authorized)				Public (contract awards)
		Total	In structures with—					Total	In structures with—			
			1 unit	2-4 units	5 units or more				1 unit	2-4 units	5 units or more	
WEST PALM BEACH, FLA.

INSTRUCTIONS FOR COMPLETING REPORT OF
BUILDING PERMITS ISSUED AND LOCAL PUBLIC CONSTRUCTION

GENERAL INSTRUCTIONS

Please summarize information on permits issued for both private and public projects and on any other public projects started of which you have a record even though no permit was required. If no permits were issued during the month, mark an "X" in the box provided on the form and return.

Please mail this report on or before the 4th day of the month.

For each type of building classification, show the number of buildings and the total estimated cost of construction of the buildings. Include all permits regardless of the cost of construction.

Section I - HOUSEKEEPING RESIDENTIAL BUILDINGS

Summarize information on permits issued for all housekeeping residential buildings. Enter data for new privately owned buildings in line items 01-04, and for new publicly owned housing units in line item XX. Report moved residential buildings in line item 05.

In addition to the cost of construction and number of buildings, enter the number of housing units to be provided. For purposes of this survey, a housing unit is defined as a house or apartment unit intended for occupancy as separate living quarters and having either:

1. a kitchen or cooking equipment for the exclusive use of the occupants, or
2. direct access from the outside or through a common hall.

Housing units do not include group quarters such as dormitories, barracks, etc. Include such buildings in the respective categories as defined in the section on "All Other New Buildings and Structures" under CLASSIFICATION DESCRIPTIONS.

CLASSIFICATION DESCRIPTIONS

I. HOUSEKEEPING RESIDENTIAL BUILDINGS

Item 01 - One-Family Houses, Including Semi-detached and Row - In the case of semi-detached and row houses, count each house as a separate building when it is separated from its neighbor by a ground-to-roof party wall. Include buildings containing one housekeeping unit in combination with space for business or professional purposes provided the buildings are primarily for residential use. Include moved buildings in Item 05.

Item 02 - Two-Family Buildings - Each building contains two housing units which may be one above the other or side-by-side. If built side-by-side, they do not have a party wall and usually have a common attic, basement, heating plant and other common features. Include buildings containing two housekeeping units in combination with space for business or professional use provided the buildings are primarily residential buildings. Include moved buildings in Item 05.

Item 03, 04 - Apartment Buildings - Each building contains three or more housing units having a common basement, heating plant, stairs, or entrance. Include buildings containing three or more housing units in combination with space for business or professional use provided the buildings are primarily for residential purposes. Also include apartment hotels in which most of the space is intended for non-transient occupancy.

Item XX - Publicly Owned Housing Units - Include all housing units owned by Federal, State and local governments, Public Housing Authorities and on military reservations. Report military barracks in Item 19.

Item 05 - Moved Residential Buildings - Include all houses moved from one location to another within your jurisdiction, or into your jurisdiction from another place; also include moved nonresidential buildings converted to residential housing units. NOTE: Do not include residential buildings moved out of your jurisdiction in this or any other item.

II. ALL OTHER NEW BUILDINGS AND STRUCTURES

Item 06 - Transient Hotels, Motels, Tourist Courts and Cabins - Include transient hotels, apartment hotels in which most of the space is intended for transient use, and motels, tourist courts and cabins designed primarily to accommodate transient trade.

Item 07 - Other Shelter - Include summer camps; lodge association, and club buildings with bedrooms (YMCA's, etc.); rooming-houses and similar nonhousekeeping residential buildings. Report dormitories, fraternity houses, nurses' homes and convents under Item 09, 14, or 17 depending upon their affiliation. Exclude trailers. Report military barracks in Item 19.

Section II - ALL OTHER NEW BUILDINGS AND STRUCTURES

For nonresidential buildings, report separately for privately owned and publicly owned buildings, using the appropriate columns. Publicly owned projects are defined as structures owned by Federal, state or local governments, special taxing districts and quasi-public agencies such as port, transit, and power authorities.

Section IV - INDIVIDUAL MAJOR PROJECTS - \$100,000 OR MORE

Describe individually in the space provided all permits for building operations with an estimated construction cost of \$100,000 or more. If you report a foundation permit for \$100,000 or more, enter under "Comments," your best present estimate of the superstructure.

Section V - REVISIONS OF EARLIER MONTHS REPORTS

Use this section to report any changes in previous months' data. Enter the month involved and the line item changed, as well as the original and revised data.

Foundation Permits: (Applicable only where separate foundation permits are issued). If the foundation permit does not have a construction cost reported, do not include the permit in the report. If it has a construction cost, enter the figure on the proper line item in accordance with the intended use of the superstructure; however, do not enter the number of buildings or number of housing units. Include the cost of the rest of the building when the permit for it is issued. At that time also report the number of buildings and the number of housing units, if applicable. (This procedure is to prevent reporting the same building or housing units twice. Report the building and housing units only once--in the month the superstructure is authorized.)

Item 08 - Amusement and Recreational Buildings - Include buildings designed to provide amusement or recreation, such as theatres, radio and TV studios, auditoriums, athletic and social clubs, arenas, bowling alleys, skating rinks, public bathhouses and boathouses, indoor swimming pools and gymnasiums. Report buildings of these types affiliated with hospitals and other institutions in Item 14, with schools and other educational establishments in Item 17, and with military establishments in Item 19.

Item 09 - Churches and Other Religious Buildings - Include churches, synagogues, rectories, parish halls, Sunday school rooms, monasteries and convents. Report parochial schools and convents affiliated with schools under Item 17 and convents affiliated with hospitals under Item 14; report military chapels under Item 19.

Item 10 - Industrial Buildings - Include plants producing, processing and assembling goods and materials, together with affiliated buildings such as warehouses, garages, administration buildings, etc. Include newspaper and printing plants, central bakeries, laundry and dry cleaning plants, ice plants, etc.

Item 11 - Parking Garages - (Open to general public) - Include garage buildings and open-deck parking structures to be used primarily for transient parking. Report parking lots under Item 20. Report storage garages affiliated with industrial plants in Item 10; with public utility companies in Item 16; with mercantile and service establishments in Item 18; with governmental agencies under Item 19.

Item 12 - Residential Garages and Carports - Include garages and carports to be built on residential property.

Item 13 - Service Stations and Repair Garages - Include also automobile repair shops. Include automobile showrooms in Item 18.

Item 14 - Hospitals and Other Institutions - Include general, TB, and mental hospitals and sanatoriums; health centers, clinics, rest homes, orphanages; homes for the aged, infirm, and indigent; penitentiaries, jails, reformatories, etc.; and all affiliated buildings such as nurses' homes, staff dormitories, laundry buildings, heating plants, garages, workshops. Report buildings designed for doctors' offices and related medical services in Item 15; staff houses and apartments under Items 01-04 or XX, and animal hospitals under Item 18.

Item 15 - Office, Bank, and Professional Buildings - Also include loft buildings, buildings designed for doctors' offices and related services, administration buildings of labor unions, chambers of commerce, and trade associations; and public administration buildings such as post offices, city halls, court houses and Federal offices. Report administration buildings and office buildings of industrial and public utility companies under Items 10 or 16 and temporary office buildings under Item 19.

CLASSIFICATION DESCRIPTIONS (Continued)

Item 16 - Public Works and Utilities Buildings - Include plants providing public services, such as transportation, communication, power, light, heat, water supply, sewage and garbage disposal, trash incineration, etc., together with affiliated buildings such as warehouses, garages, administration buildings, etc.

Item 17 - Schools and Other Educational Buildings - Include schools, colleges, seminaries, libraries, museums, observatories, zoo buildings, etc., and affiliated nonhousekeeping buildings such as dormitories, convents, fraternity houses, gymnasiums, infirmaries, heating plants, laundries, etc. Report university hospital buildings under Item 14, and houses and apartments for faculty and students under Items 01-04 or XX. Please differentiate between private and public schools.

Item 18 - Stores and Other Mercantile Buildings - Include buildings used in buying, selling, distributing and storing merchandise and materials or performing consumer services: Stores, auto and other showrooms, commercial warehouses, grain elevators, garages for storing commercial vehicles, restaurants, taverns, nightclubs, bakery shops, laundry and dry cleaning shops, laundromats, frozen food lockers, beauty and barber shops, animal hospitals, etc.

Item 19 - Other Nonresidential Buildings - Include government service buildings such as armories, police and fire stations, workshops, garages; all nonhousekeeping buildings on military reservations and farms; bomb shelters not associated with any other residential or nonresidential buildings (community shelters); bathhouses and boathouses on residential property, etc.

Item 20 - Structures Other Than Buildings - Include outdoor swimming pools, parking lots, drive-in theatres, stadiums, grandstands, etc. Exclude special "installation" permits issued by your office to cover electrical, plumbing, heating air conditioning or similar mechanical work, or the installation of fire escapes, signs, etc.

III. ADDITIONS AND ALTERATIONS

Item 21 - Houses and Apartments - Include all permits for additions and alterations to housekeeping residential buildings including conversions; include bomb shelters built as additions and alterations to these buildings.

Item 22 - Other Buildings - Include all permits for additions and alterations to nonresidential buildings and nonhousekeeping residential buildings (hotels, motels, etc.); also include bomb shelters built as additions and alterations to these buildings.

NOTICE — Your report to the Census Bureau is confidential (Title 13 U.S. Code). It may be seen only by sworn Census employees and may be used only for statistical purposes.
